Reagan Extends Grain Sales As 'Favor' to U.S. Farmers

WASHINGTON -- President Reagan, in a move certain to please U.S. farmers but rile European allies, said Friday that he will accept another one-year extension of the U.S. agreement to sell wheat and corn to the Soviet Union.

Mr. Reagan held out the possi-bility of expanding 1982-83 sales. beyond the current 23-million ton level, but he said the United States will not discuss a new long-term

cials have accused the Israelis of periodically cutting off supplies to pressure the PLO to agree to withdraw from the city. Israeli officials said they lifted a blockade on emergency supplies earlier this month, and they have accused the PLO of using the issue for propa-

In Geneva Thursday, Ambassador Ovadia Soffer of Israel accused the leadership of the World Council of Churches of making "libelous" charges in a resolution condemning the Israeli invasion of Lebanon. The resolution accused Israel of "oarring access of international humanitarian ians in West Beirut.

The official said the Israeli ofmisoners and refugee relocation prisoners and of blocking delivery centers" and of blocking delivery

To Fighters, Pullout Would Be to 'Palestine'

New York Times Service

OUZAI, Lebanon — Yasser Arafat, the Palestine Liberation Organization chairman, was out touring the PLO's front-line bunker here the other day when one of the fighters leaning behind a red dirt barricade asked him whether it was true that the PLO was withdrawing from Beirut.

"What do you think?" Mr. Arafat asked him in his typically evasive manner I think that if you order us to

withdraw I will shoot you with this gun," the guerrilla said. Mr. Arafat chuckled, probably

because he realized that this simple soldier had captured his probler how to negotiste an honorable withdrawal of the PLO from Lebanon that can be sold to his fighters, and history, as a victory. The boys in Position 1, a sand-

bagged redoubt next to the western runway of Beirut International Airport and only 200 yards from the forwardmost Israeli tank, are not optimistic.

The guerrillas insist that they will abide by whatever political de-cision is made by the PLO leadership. But in the same breath they insist — and are told every day in the PLO newspaper Filistin al-Thawra and radio Voice of Palestine - that the only place the guerrillas will withdraw to is "Palestine." They understand this to mean they will leave Beirut only in return for a political concession that advances the Palestinian

Majid, a 28-year-old guerrilla based in Position I, was asked what he thought of the proposal by Philip C. Habib, the U.S. special envoy to the Middle East, that the PLO fighters leave Beirut by bus, go to Syria and then be dispersed to different Arab countries.

"I don't understand your ques-tion." he said. "You mean we pull out without anything in return?" "Let me explain to you some-

thing," he continued, cradling a Kalashnikov in his lap. The Israelis could let the PLO withdraw from Beirut with every single gun it has, but if it is without anything political, it would be the death of the PLO. If we stay here and fight as we have for 55 days, and even die, at least the Palestinian cause will have some meaning and re-If Mr. Arafat is planning to

make any concessions to Mr. Ha-bib, whereby the PLO would agree fighters about it and no effort has enough canned food and rice to been made by the PLO to prepare last for six months and insisted

Yasser Arafat talked with foreign correspondents in West Beirut moments before Israeli jets, gumboats and artillery began bombarding the city, ending a cease-fire that lasted almost two days.

them psychologically for such a that a visitor take some figs back The Ouzai front typifies the

To the contrary, they have been husily reinforcing their positions. What were simply dirt barricades two weeks ago on the coastal highway leading from Beirut to Ouzai are now strengthened with sandbags and machinegun nests.

Abu Nussur, a PLO district commander in the Ouzai area, said their bunkers are so solid that in the last seven days of Israeli aerial and naval bombardments of Ouzai, only 10 guerrillas were killed. Most of the casualties were civilians living closer to West Beirut, he said.

Provisions for 6 Months

The Israeli blockade of West Beirut has yet to have any effect on the guerrillas. While visiting Position 1 a truck drove up dropping off piles of freshly baked loaves of Arabic flat bread, fresh to a "nonpolitical" evacuation figs, water and tinned meats and from Beirut, no one has told the fish. The guerrillas said they have

with him to West Beirut.

A 27-year-old Ouzai district commander for the Popular Front for the Liberation of Palestine-General Command, one of the eight groups in the PLO coalition, said he goes back to West Beirut every few days "to take a bath and freshen up."

He argued that because Mr. Habib does not speak directly to the PLO, but only through Lebanese intermediaries who basically want the PLO to leave, the U.S. envoy has "no real idea what the guerrilla position is." This explains, he said. why after more than a month of negotiations Mr. Habib is still uncertain whether or not the PLO

will leave.
"Look," he said. "we are not going anywhere until we get what we want. We have no illusions about the Israelis.

"We know just how many tanks and planes they have out there. But let me assure you if they come in, their casualties will be 10 or 20

kind of difficulties the Israelis would face. A highway leads from Position 1 all the way back to West Beirut, about three miles to the north. On both sides of that road are boneycombs of tightly packed houses and factories. While a visitor was being shown

around, Lt. Col. Ahu Tayeb, the overall PLO commander of the Ouzai front, arrived with a retinue of aides and a bodyguard. Like other PLO commanders, he is in constant contact with the PLO's underground operations room the location of which is constantly moved - through a radio in his

U.S. Repeats Intention To Punish Companies **That Break Sanctions**

Renters
WASHINGTON - A Reagan administration official reiterated Friday the United States' determination to punish violators of its Soviet pipeline sanctions, but said that Washington expected that lew, if any, companies would defy

Undersecretary of Commerce Lionel H. Olmer testified before a Senate Foreign Relations subcommittee where some senators criticized the sanctions as costing U.S. jobs without hurting the Soviet

Mr. Olmer said that the administration would enforce "to the ex-tent necessary" the sanctions against the European sale of U.S.licensed equipment for the project. The pipeline will carry natural gas

from Siberia to Western Europe He said that enforcement might include a cutoff of U.S. trade with a European company that violates the sanctions.

But Mr. Olmer said that he knew of no firm planning to defy the sanctions despite the French government's directive to French companies to ignore the boycott and Britain's consideration of issuing a similar directive.

There is intent and there is intent," he said. "There is intent stated to the media and there is intent in actually putting together proposals. We don't know of any company planning to violate the sanctions."

Undersecretary of State James L. Buckley said that the sanctions were needed to "inflict hurt" on the Soviet Union until it used its influence to end martial law in Po-

week of the Polish military ruler, Gen. Wojciech Jaruzelski, to end martial law this year if calm continued "may show that the sanctions are hurting

Sen. Charles Percy, chairman of the Foreign Relations Committee, said that the sanctions were hurting American workers and had no visible effect on the Soviet Union which "can turn around and buy the same thing some place else."

"We're huilding up Japan at the expense of the United States," the Illinois Republican said. "We are burting ourselves, shooting our-selves in the foot, and not hurting the Soviet Union at all." Sen. Charles Mathias, Republi-

can of Maryland, expressed con-cern that the sanctions might drive European or Soviet manufacturers to develop their own pipeline equipment and permanently take business from U.S. firms.

In Boan Friday, Lothar Rühl, a West German government spokes-man, rejected Mr. Reagan's arguments for the embargo.

Mr. Reagan had said at news conference that the embargo would deprive Moscow of hard currency earnings that it could otherwise spend on rearmament. Mr. Rühl said that the president's reasoning was "illogical and hardly

convincing."

Mr. Rühl said that Chancellor Helmut Schmidt of West German, after intensive talks with Secretary of State George P. Shultz, an old friend, and based on his own experience, still believed the "family quarrel" would be over by the end of this year.

Ban Affects U.K. Firms Not Linked to Pipeline

By Peter Osnos on Post Service

LONDON — Reagan administration restrictions on the sale of energy equipment to the Soviet Union are so broad that as many as a dozen British companies with contracts worth almost \$140 million are covered, even though they have nothing to do with the Siberi-an gas pipeline, according to offi-

The existence of this littleknown aspect of the export ban helps explain why the British are so eager to persuade President Reagan to reconsider his decision.

The value of all British contracts with Moscow in the energy field is estimated at about \$400 million, half the annual value of British ex-ports to the Soviet Union.

The companies included in the ban, even though not involved with the pipeline, all have some U.S. connection that could make

'King' Will End 20-Year Rebellion, **Uganda Reports**

KAMPALA, Uganda — Self-proclaimed King Charles of Rwenzururu has agreed to end his 20year secessionist movement against Uganda and lead his armed followers down from their remote hideouts in the Mountains of the Moon, according to govern-

ment officials The rebel movement, which grouped the Bamba and Bakonjo tribes in a struggle for independence, bad declared the mountain slopes in western Uganda along the border with Zaire as the sovereign kingdom of Rwenzururu. It regularly had skirmishes with the Ugandan Army.

Charles Welsley M.M. Iremangoma, who as well as king pro-claimed himself supreme commander-in-chief, head of state, and minister of defense, has promised to leave the mountains, settle in the nearby town of Kasese and formally acknowledge the constitu-tion, Uganda radio reported

Thursday.
It said his men will surrender their arms Aug. 15 at the foot of the mountains. The Ugandan Army's chief of staff, Brig. David Oyite Ojok, has promised that Ugandan authorities will not prosecute anyone after the surrender,

Israelis Puzzled by Quantity of Arms Israeli Jets Seized From PLO in Initial Invasion

By Norman Kempster

Los Angeles Times Service
JERUSALEM — The Israeli Army, in its lightning advance through Lebanon to the outskirts of Beirut, captured an impressive store of Soviet- and American-made weapons from retreating Palestine Liberation Organization forces, possibly enough to arm a lightly equipped infantry division.

Although some of the weapons were captured in combat, most were found abandoned in hidden arms caches that proved no use to the guerrillas in the face of the rapid Israeli advance.

It still is not clear why the PLO had stockpiled so many weapons. Some Israeli officials suggest that the PLO might have been planning major offensive that was prevented by the Israeli attack, Others think the guerrillas simply acquired the arms because they were available on the international market and because Saudi Arabia and other countries were willing to pay

in any event, the pile of captured weapons has given Israel an opportunity for both economic and public relations gains.

The government has said it is prepared to sell some of the captured arms to various Third World countries in an effort to offset part of the cost of the war, which is esti-Britain has invoked its own mated to be \$1 billion so far. And PLO armaments into their speeches defending Israel's decision to invade Lebanon.

Detailed Report Issued

The military command recently issued a detailed report on the cap-tured PLO weapons. It said that Israeli forces had seized about 25,000 submachine guns and other light arms, 19,000 hand grenades, 46,000 mortar rounds, 14,000 artil-British officials made clear lery shells, 16,000 anti-personnel and anti-vehicle mines, 883 antirectly order companies to defy the tank weapons, 148 mortars and ar-U.S. embargo, but will take whattillery pieces, almost 80 tanks, about 170 armored personnel car-

In addition, of course, some PLO weapons were destroyed on the battlefield and the retreating guerrillas took as many as they could with them to West Beirut.

Most of the captured arms were produced in the Soviet Union and other Communist countries but there was a sprinkling of British, West German and American arms, including some M-16 automatic rifles and ammunition still in packing cases with shipping labels showing that they were sent originally to Saudi Arabia.

Judging from the list, the PLO was better equipped than most guerrilla organizations but not as well as a modern army. Although the figures issued by

the military command are impressive, some Israeli officials have implied that many more weapons were involved.

Five Divisions

For instance, Mr. Begin recently told a group of American contributors to the United Jewish Appeal. "In one field we captured an amount of weapons that ought to be given to 15 brigades — in other words, to five divisions."

Depending on the country, a division ranges from about 12,000 to about 17,000 men, so five divisions would have a minimum of 60,000 troops. The captured arms listed in the inventory, if given to such a force, would average out to less than one light weapon for every two men, about one hand grenade for every three and just over one tank for every 1,000.

Zeev Schiff, military correspondent for the newspaper Ha'aretz, recently wrote that some accounts of the extent of the captured arms were "reminiscent of 'A Thousand and One Nights."

"This is a rich and variegated booty, but to say that it is sufficient to fully equip live divisions would be misleading. Mr. Schiff wrote, "It might perhaps suffice to arm one division with the latest small arms only."

Of the 25,000 light arms, about

10.000 were top-of-the-line Soviet AK-47 assault rifles. In addition,

there were about 3,500 nonmilitary and hunting rifles, about 3,000 aging Western service rifles and an assortment of other weapons, including shotguns.

Begin Suggestion

Mr. Begin suggested earlier, in a speech to parliament, that the PLO may have been storing Soviet weapons for possible use by the Soviet Army in the event of a su-perpower showdown in the Middle East, That seems unlikely, howevbecause the weapons listed in the inventory clearly would be considered obsolete by the Soviet

It also seems unlikely that the PLO ever thought it could take on the Israeli Army in conventional warfare. Mr. Schiff wrote that a force equipped with the captured weaponry does not constitute a danger to the existence of the state of Israel It should not be forgotten that the IDF [Israel Defence Percel the IDF [Israel the IDF [Isr fense Force] destroyed the terrorists' military infrastructure in Lebanon, not single-handed but with half a hand."

Eliahu Ben-Elissar, chairman of the Defense and Foreign Affairs Committee of the Israeli parlia-ment and a close associate of Mr. Begin, said in a recent interview that the PLO probably bought arms simply because it could afford them.
"They had unlimited sources of

money from Saudi Arabia, Kuwait and Libya and they had unlimited sources of equipment from the Soviet Union, East Germany and Li-

U.S. Weighs Takeover Of Uranium by Industry

By Judith Miller

WASHINGTON -- The Reagan administration is considering whether to turn over the government-owned, uranism-enrichment business to private industry, according to a White House docu-

In a memorandum, dated July 7, 1982, the White House counselor, Edwin Meese 3d, requested that the Energy Department and two other concerned agencies "proceed with the consultations with industry you recommended" and "complete the options paper" on a "possible transfer of the U.S. uranium carichment business to the private

ctor."
An effort by the administration of former President Gerald R. Ford to transfer the government's uranium enrichment activities to private companies was defeated after intense debate in Congress, and bitter opposition can be expected should the current administration offer a similar proposal.

Nicaragua Is Seeking to Buy French, Soviet Jet Fighters By Christopher Dickey

Washington Post Service

MANAGUA - Nicaragua is pushing ahead with plans to acquire Soviet MiG, French Mirage or other jet fighters, the Nicaraguan defense minister,

Humberto Ortega, has revealed.

Mr. Ortega declined to specify the exact model of the planes being sought except to say they would be used primarily to engage other aircraft in the event of an invasion. His estimates range from eight to 15 fighters as the potential force Nicaragua hopes to

A spokesman for the French Embassy in Washington has said that no further arms sales to Nicaragua are contemplated by his government. The U.S. State Department alleged last year that Soviet-bloc countries were training Nicaraguan pi-

lots and several runways had been lengthened to bandle the relatively sophisticated MiG-21. Mr. Ortega insisted that the jet fighters, as well as Soviet tanks acquired last year, are strictly for de-fensive purposes in a hostile environment in which Nicaragua's Sandinista leaders say they must equal or surpass the combined strength of all other regular Central American armies in order to protect

their leftist revolution. He said the range of the planes would be limited. "We're not going to bomb Washington," he added.

Mr. Ortega set no timetable for the arrival of the planes, saying it would depend largely on the development of a capability to handle them, including training of pilots.

West Germany, fully and other West and East European countries have been approached as sources of arms and aircraft. He said his government is working hard to strike a deal with France for the acquisition of Mirage fighters, possibly to be integrated in an air force that also would include MiGs.

With the exception of two French Alouette helicopters that arrived here a few weeks ago as part of a \$17-million French arms package, most of the arms acquired by the Nicaragua in the last two years were manufactured in Soviet-bloc countries and obtained directly or through third parties such

Joint U.S.-Honduran military exercises this week along the border in the troubled Caribbean coast region have pushed tensions here even higher. A U.S. Embassy spokesman said U.S. transport planes have been moving the Honduran troops dur-

The Nicaraguans consider the Honduran Air Force as a particularly serious threat. Honduras has a dozen French Super Mystere fighters. Mr. Ortega claimed that the Hondurans are also trying to acquire F-5 fighter planes from the United States, A Honduran diplomat said such a purchase has been discussed for several months, but nothing has come

El Salvador recently received six U.S.-made. A-37B fighter-bombers, which are modified trainers intended mainly to back up ground troops in a guerrilla war. Guatemala has 10 A-37Bs.

"Honduras has airplanes, Guatemala has airplanes, El Salvador has airplanes," Mr. Ortega said. Nicaragua does not have planes."

He added that under the previous regime in Ni-caragua, from which the Sandmistas seized a hand-ful of aircraft, the orientation was toward guerrilla warfare, not fighting off an invasion.

According to Mr. Ortega. Nicaragua's air defense consists of conventional anti-aircraft batteries supplemented in some areas by shoulder-fired heatseeking missiles. He declined to say where they were manufactured.

The Sandinista army has been transformed in three years from a guerrilla force of less than 5,000 into a force of about 25,000 regulars. Mr. Ortega as well as U.S. military analysts in Panama said the size of the army has not grown substantially in more than a year, but the level of training, logistical and tactical skills is improving dramatically.

Reagan Aid Plan for the Caribbean Dies in House on a Technicality

By Margot Homblower and William Chapman

Washington Post Service
WASHINGTON — The Reagan administration's economic assistance plan for the Caribbean basin suffered another reversal when a carefully crafted bipartisan agreement to push it through the House

of Representatives died on a point of parliamentary procedure. The compromise that would have added \$350 million to a 1982 supplemental appropriation went down to defeat Thursday because authorizing legislation had not yet passed the House.

The bill would have included as least \$75 million for El Salvador, the largest beneficiary. The administration says the aid is necessary to rescue El Salvador from an economic morass as it resists leftist

The crucial point of order was raised by Rep. George Miller, Democrat of California, and others who objected in part to the way the money would have been divided. The House Foreign Affairs Committee had endorsed the \$350million authorization but it had never been sent to the floor.

The compromise worked out by the administration and Reps. Jack F. Kemp, Republican of New York, and Clarence D. Long. Democrat of Maryland, would have given the White House a major victory. The administration had agreed not to push for a large separate package of military aid, including \$35 million for El Salva-

Rep. Kemp called the failure

The last chance for the Carib-

bean plan would be Senate passage and House concurrence later this year, but that seems doubtful. The Senate Foreign Relations Committee has transformed it, against administration wishes, into a World

Other important parts of the Caribbean plan call for investment incentives and trade preferences for several countries, but those, too, have been blocked. A Ways

Type of Interferon Is Found Effective Against Cold Virus

NEW YORK - Synthetic interferon, which is made by gene splic-ing, can prevent one kind of cold vithout harmful side effects, according to a team of British doc-

They said in a preliminary report in the current issue of The ancet, a British medical journal, that interferon given in a nasal spray prevented the development of colds in all 19 volunteers subsequently given potent cold viruses. When the viruses were given to 22 others who had oot received interferon, eight developed colds, the researchers said.

Dr. Geoffrey Scott of the Medi-l Research Council Common Cold Unit in Salisbury, England, where the research was done, said Thursday that no harmful side offects developed. They, however, tested interferon only against a type of rhinovirus, an infectious agent that causes 25 to 30 percent of all colds in adults, according to the National Institute of Allergy and Infectious Diseases in Bethesloaded the trade section with pro-tectionist amendments and the full committee has not even considered

The economic part of the plan that was defeated Thursday would have granted selected countries development funds and money to be used in generating local currency to help them overcome severe balance-of-payment problems.

At least ooe member of the group raising the point of order in-dicated that opposition to aid for El Salvador was part of their motive. Rep. Tom Harkin, Democrat of lowa, said many members favor cutting off aid because of El Salvador's perceived violations of human rights.

"We are facing a point of order when the world is in flames," countered Rep. Joseph M. McDade, Republican of Pennsyl-

Meanwhile, administratioo officials encountered skepticism when they appeared before the House Foreign Affairs Committee to justify a report that human rights vio-lations have declined and land reform is progressing in El Salvador.

"All available evidence suggests that the most serious violations of buman rights — deaths attributed to political violence — are on a slow downward trend," Assistant Secretary of State Thomas O. Enders told the committee. .

Mr. Enders acknowledged that progress in prosecuting killers of four American women in El Salvador has been slow because the war has caused turmoil in the judicial system. He said evidence gathered a special commission was conclusive, but a successful prosecution requires a second investiga-

MUMMY UNCOVERED - Arturo Jiminez, a Peruvian archaeologist, unwrapped a 700-year-old Peruvian mummy at the World's Fair in Knoxville, Tenn., and found the remains of a 21/2-year-old child. The National Congress of American Indians protested the ceremony Wednesday, saying that it was sacrile-gious, and urged all Christians and Jews to boycott the fair.

Jury Decides The Post Libeled Mobil President

WASHINGTON — A federal court jury awarded more than \$2 Tavonlareas' shipping company, Atlas Maritime Co., which does millioo in compensatory and punitive damages Friday to the president of Mobil Oil Corp. after coocluding that The Washington Post beled him in a 1979 article about his business relationship with his

Assessing Bechtelmania

From THE WASHINGTON POST

Beatlemania. Now we have Bechtelmania the concern you hear voiced about this giant construction company that seems to be stocking the upper reaches of government the way a fish hatchery stocks the Columbia River. What is the object of this concern?

What sort of company is Bechtel? Secretive, for one thing. Based in San Francisco and entirely owned by the Bechtel family and top executives, Bechtel does not have to disclose bow much money it makes or how much it pays its 120,000 employees.

Successful, for another. Despite the secre-

cy, there is reason to believe that Bechtel is very profitable and very good at what it sets out to do: build things — big things, like nu-clear power plants, new cities in Saudi Arabia, much of Washington's Metro subway system. Bechtel constructed Hoover Dam and the San Francisco-Oakland Bay Bridge, the Transarabian Pipeline and the govern-

ment buildings of Brunei.
Should Bechtel's business activities give cause to worry about its alumni and associates in government? The company's extensive dealings with Saudi Arabia and other Arab countries have led some people to doubt whether George Shultz or Caspar Weinberger or W. Kenneth Davis (who is deputy secretary of energy) or Middle East negotiator Philip Habib can be disinterested about

There has been nothing quite like it since American policy in the Middle East. But we Beatlemania. Now we have Bechtelmania — think their Middle East policies should be assessed on the merits, not on the basis of Bechtel's presumed views. Mr. Shultz and Mr. Weinberger have proved their integrity in some of the most difficult circumstances public officials have ever faced. Mr. Habib's disinterest has the implicit endorsement of the parties whose conflicts he is mediating.

We find it more interesting to ponder the possible effect of the scope of Bechtel's operations on these men's views, Bechtel's work extends around the world. Its main competitors are foreign companies. Its main customers are local and foreign governments and large corporations, not individual consumers. Probably the majority of its business is out-side the United States.

We certainly don't think there is material for imputing some sort of conspiracy here, any more than when President Carter appointed to high office several alumni of the Trilateral Commission, or earlier administra-tions leaned so heavily on Midwest-based industrial companies for their top businessman appointees - from Charles E. Wilson of General Motors to Robert McNamara of Ford to Neil McElroy of Procter & Gamble. In our view, anyone who deserves appoint-

ment to high office should be able both to use and to transcend the experiences he has had in private life. The good ones do.

Policy for El Salvador

This much is palpable in the "certification" debate over El Salvador. Progress is in the

eyes of the beholder. At the State Department, they have looked at what President Reagan candidly calls "un-fortunate things" and decided it could be worse. So the administration has again certified that El Salvador is making progress in curbing human rights abuses and promoting economic reforms, the key conditions Con-

gress has set for continued military aid. This certification process is not quite the sham that Connecticut's Senator Christopher Dodd perceives. But neither does it achieve its purpose of shaping American policy toward El Salvador. In truth, there is not much of a policy besides giving "our" side enough bullets to deny victory to leftist guerrillas, while keeping a hodgepodge regime afloat. The certificate is no substitute for a strategy that would deny bullets to reactionaries whose brutality and land grabbing

frustrate political accommodation. On this central point, the State Department's certification report is artfully equivo-cal. For example, is the toll of political violence rising? The report says the murder rate has declined "somewhat" - "according to available statistics." State relies on newspaper accounts whose completeness is chal-lenged by human rights groups. Still, to its credit, it includes those contrary judgments.

Ambiguities are admitted also on the subject of land reform. But the report stresses the good faith of President Magaña while discreetly playing down the role of Assembly President D'Aubuisson, who stands accused by one of the program's key U.S. planners, Roy Prosterman, of leading a "virtual coup d'état" against land reform.

But if the report is equivocal, so is the mood in Congress. Senator Nancy Kassebaum of Kansas is a barometric figure. Early this year she joined Dodd to persuade the Senate to chop \$100 million from the requested \$166 million in military aid. But she re-mains unwilling to cut aid completely and forfeit the battle to the guerrillas.

These periodic certifications cannot be directly rejected by Congress. But it can cross-examine the authors and then after the foreign aid bills, possibly reducing appropria-tions or adding new conditions for their dis-bursement. This is a second-best way to run a foreign policy. Salvadorans are right to question whether Congress can really decide at long distance and in detail how best to promote human rights and social justice.
The highly successful March 28 election

was plainly intended to impress Congress with El Salvador's progress toward democracy. Yet the results of that election strengthened extremists whose policies might well nullify the gain. So there can be no letup in the effort to use the considerable U.S. leverage to promote social peace and justice in a country that has had pitifully little of either. If the administration could for once convince Congress that this is truly its purpose, at least

THE THE WORLD CONTROL OF THE PROPERTY OF THE P

Even if it is true that the PLO, given the bitterness of a dispossessed people and the divisions of a disparate organization, has refused to recognize the Jewish state in the "clear and unequivocal" way that Washing-ton wants; even if, in its Beirut stronghold, it intersperses its fighters among civilians who are not a party to the conflict; even if it constituted outsized arms dumps in south-ern Lebanon — its "final" destruction (an improbable outcome in any event) does not warrant any and all means.

It does not warrant the razing of camps in which most of the 400,000 civilian Palestinian refugees in Lebanon made do in pitiful conditions; or the interning without the slightest guarantees of thousands of so-called suspects; or the death of women and children by the hundreds in the flames of West Beirut for the mere reason that they were presumed to be living alongside guerrillas.

The infernal logic into which Mr. Begin has locked himself is the one that led so many authorities before him from realism to cynicism and from what is defensible to what is odious. It was perfectly understandable that be should want to dispel the threat against the villages of northern Galilee; it was tolerable that he should try to exploit his initial successes, encouraged as he was by the ap-plause of some of those whom he aimed to "liberate" from the burdensome Palestinian presence. But now the machine has bolted. It has gone mad. Here we have the Lebanese state invaded and humiliated, the better to be restored; half of Beirut being flattened by bombs, so that its trials may cease; bundreds of civilians killed — as happened previously

1907: 'Regenerator' of Egypt

LONDON — A grant of £50,000 was voted by the House of Commons to Lord Cromer in recognition of his great services in Egypt. Prime Minister Ballour said that Lord

Cromer had raised Egypt from bankruptcy to prosperity and had reduced the burden of

taxation per head 25 percent. He added in his

warm tribute to the regenerator of Egypt that the Egypt of today is the work of one great man. Mr. W. Redmond opposed the grant in

a passionate speech, saying that when Lord

Cromer went to Egypt it was to carry out a

declared policy of evacuation, but the British had been in that country for 24 years now.

Was Lord Cromer to receive £50,000 because

be had made Egypt into a British province?

PHILIP M FOISIE

CARL GEWIRTZ

the Syrian "pacifier" - so that acceptable order may prevail at last.

The Israelis are without a doubt right to be indignant when their detractors, exceeding all measure, compare them with their Nazi executioners and accuse them of "genocides" or "final solutions," references whose very mennon provokes their revulsion.

Nevertheless, when he obstinately refuses

any still conceivable settlement, when he relies on hunger, thirst and bombs to quell a population infiltrated by his enemies, Mr. Begin uses methods that disqualify the ethical case he tries to plead.

- Le Monde (Paris).

Squabbling Over Steel

We now risk a period of tit-for-tat retalia-tion. It is a game which the politicians and officials will have the greatest difficulty controlling. The dispute [over steel exports] shows how fragile the GATT-built world trading system has become and how recessionary pressures in the industrialized countries are making possible a return to the beg-gar-thy-neighbor policies of the 1930s.

There are rights and wrongs on both sides.

It is true that the Europeans do subsidize their steel exports. But nothing like as much as the Americans would have it.

But if subsidies are against the GATT code, then so are the sort of quotas which the Americans seek to impose. What is needed are cool heads, a clarifying and tightening up of GATT rules and, above all, a commitment to free trade both in Europe and America

1932: Poison Liquor Kills 15

NEW YORK — A plague of poison liquor such as has not imperiled the city for some years was disclosed with the announcement that 15 men have been killed by "smoke" and

that as many more are in criticial condition.

Five men were found dead in the streets of

the lower East Side. Ten, picked up in the

same district in various states of collapse, died at Belleville Hospital. Every available

detective in the lower East Side has been mo-bilized with orders to find the source of the

poison beverage. "Smoke," also known as "the Bowery Cocktail," is a mixture of raw

alcohol and water, of a whitish smoky ap-pearance, sold in up-and-coming East Side "joints" at a nickel a throw.

Director of Finance

which goes beyond rhetoric.
— The Daily Telegraph (London).

NOW HOW DO I BACK OUTTA THIS GRACEFULLY?

<u>Much Ado for a Pipeline</u>

Outreaching the Law to Hurt the Allies

WASHINGTON — The British trade secretary invoked the Protection of Trading Interests Act the other day as a step to prevent British firms from complying with the Reagan administration's embargo order on equipment sales for the Soviet gas pipeline. The trade secretary acted neither unreasonably nor in a spirit of ungrateful defiance.

The extraterritorial extension of United States law has always been an issue of contention with foreign governments, and on several occasions a serious irritant in relations. The foreign outrage over the latest order was entirely predictable.

This is no mere legal squabble. Regardless of whether European subsidsaries are wholly owned by U.S. interests, or whether licensees are dependent on U.S. technology, these are foreign companies in every sense of the word and exclusively subject to the laws of their own countries.

Britain is only one of a dozen trading partners of the United States that at various times have taken govern-mental action to protect their citizens and corporations from what they regard as infringements on their sover-eignty. Many have passed legislation aimed at preventing their companies from obeying U.S. court decrees in

antitrust and regulatory proceedings.

The French courts have even authorized temporary takeover of a French subsidiary to force it to fulfill a contract for truck assemblies that were barred by a U.S. Treasury Dewith the Enemy Act.

International law takes a dim view of attempts to control the actions of a foreign corporation in its host territory. The U.S. Supreme Court seems to agree. While confirming that the United States can control acts of its own citizens, including corporations, wherever they take place, and to a limited extent can even regulate acts of foreigners that have a substantial effect within the United States, it has never sanctioned overseas application of U.S. law to serve a U.S. national purpose. Only recently the Supreme Court ruled that the American subsidiary of a Japanese company was ex-clusively subject to U.S. law. The June 18 action was taken with-

out consulting the European allies and with potentially devastating re-troactive effect. Technically the Export Administration Act authorizes the president to act unilaterally and alone. In practice it has to be read in the context of a system of collabora-tion between 15 NATO nations plus Japan that for 30 years has been regulating the export of armaments, straBy Charles Maechling Jr.

tegic materials and military technology to the East. Until now the pattern of U.S. policy has been never to take ufacture 68 more assemblies, in some embargo actions in an economie area crucial to its allies without prior consultation, let alone notification.

In this case the president's hreach was made all the worse hy first downgrading the pipeline issue to the point of not raising it at all during the Ver-sailles summit and meetings with Eu-ropean leaders in Bonn and London, and then springing it as a major for-eign policy initiative immediately after his return to Washington.
The embargo order is aimed at foreign sales of both compressor station

assemblies and the all-important turbine rotor, prohibited by an earlier order from being exported directly from the United States.

Hardest hit would be John Brown of Great Britain, AEG-Telefunken of West Germany and Noovo Pignone of Italy, which together are manufacturing 125 turbines under license from General Electric. Also affected are French and West German subsidiaries and licensees of General Elec-

cases including rotors.

The basic contracts were signed months ago, and by this time a vast network of subcontractors, component manufacturers and parts sup-pliers bave also been given binding commitments. More than \$10 billion in business is now at stake, not to mention the prospect of additional contracts to build the East European legs of the pipeline.

Apart from the issue of principle, there is no way for the order to be made effective without disrupting significant segments of the European economy while increasing Western Europe's energy dependence on members of the Organization of Petroleum Exporting Countries.

As I was told on a recent trip to fine European expitals the Person

five European capitals, the Reagan order will certainly be nullified by the governments concerned - not at a political level and accompanied by noisy declamation, which would strain the alliance and make the pres-

ident lose face, but at the less visible legal level on a case-by-case basis.

After incensing the allies in Western Europe, without harming the Soviet economy or affecting the internal situation in Poland, the Reagan

government, although not enthusias-tic about this deal, would understand

the European — especially the German — arguments that support such

an agreement with Moscow.

This has turned out to be errone-

administration is now scrambling to find a graceful exit. So far the only sure casualties are

the employees and stockholders of General Electric, Caterpillar Tractor, Dresser and other U.S. manufacturers, who are barred by an earlier order from making direct sales from the United States.

As the former bead of the world's largest construction company, Secretary of State George Shultz certainly understands the full ramifications of the problem. If he wants to prevent the president from suffering a series of bumiliating rebuffs by America's European partners, he should get the June 18 order rescinded as a quid pro quo for a tighter allied system of exports to the Soviet Union.

The writer, a resident associate at the Cornegie Endowment for International Peace, contributed this comment to The Baltimore Sun.

A Friendly Visit Wasted

HANNOVER - President Reagan's brief visit to West partment order under the Trading Germany in early June was an enormous success. Since then, bowever, not only has its impact evaporated, but West German relations with the United States have never been worse. The Reagan trip has backfired bad-ly. For the president's conduct in the

last two months has created the impression that he deliberately concealed his true intentions toward West Germany during his trip bere.

The hope now must be that George Shultz, the new secretary of state, can somehow repair the damage. But, given suspicions on this side of the Atlantic, his job will not be easy.

Reagan's two speeches here, one in West Berlin and the other in the Bundestag in Bonn, raised expectations that tensions between the United States and West Germany would abate. Evoking the shared experience of the allies since the end of World War II. Reagan even silenced left-wing critics of U.S. policy. But hardly had be returned to Washington than his oratory boomeranged, and atti-judes toward him since have become increasingly bitter.

The first blow was the apparently

By Wolfgang Wagner

forced resignation of Alexander Haig as secretary of state, a development that caused something like a scismic shock amone West Germans sympathetic to the United States. Haig was admired and respected during the days when he commanded NATO forces in Western Europe. For both the West German government and public, he symbolized the U.S. defense commitment to the area.

Then came Reagan's decision to intensify his efforts to prevent the con-struction of the Soviet natural gas pipeline to Western Europe. The move is doubly depressing to West Germans who want to maintain close links with America because it will not succeed and it threatens to tarnish American prestige in the process.

In addition to the economie con-siderations, the political angle — at least as seen from a West German perspective - is that the Soviet Union has more to gain over the long term from mutually advantageous co-operation than from confrontation. The Reagan administration, seen from here, appears to be set on a col-

lision course with the Soviet Union. Reagan's hostility to the pipeline had been known since be took office. What has been surprising has been his instransigence in a matter that

was and still is open to conciliation.
On the eve of Reagan's visit, the newsmagazine Der Spiegel published a cover portrait of him above the cap-tion, "The Unwanted Guest." It was an outrageous comment, such as had never before been aired against an American leader. Not even Leonid Brezhnev was so treated by the media when he came to West Germany.

The remark proved to be wrong. Reagan was greeted with an enthusi-asm that reflects the depths of West German affection for America; the demonstrations staged against him were superficial. But the public mood has changed sharply. The alliance be-tween the United States and West Germany, vital to the foreign policies of both, could be in jeopardy. Secre-tary Shultz faces the critical challenge of rebuilding the partnership.

The writer is editor of the Hannoversche Allgemeine Zeitung. This com-ment was distributed by International Writers Service.

The writer is minister of economics of the Federal Republic of Germany WASHINGTON — The dispute reconsider. Above all, the harsh over the West European gas pipeline deal with the Soviet Umon has reached a degree on both sides of the Atlantic that should have been ally, British Prime Minister Margaret

A Family Dispute

To Settle Patiently

By Otto Graf Lambsdorff

Thatcher, are an alarming signal of discontent within the alliance. The West Europeans are in agreement: The application of the principle of extraterritoriality in U.S. gov-

avoided. This family dispute — and it is no more than that — now has to be settled in patient talks between the governments of the Western alliance. ernment decisions is unacceptable to us. It violates our sovereignty. There-Public dispute does not benefit anyfore, we have to reject it. For years, the Federal German This is the unanimous position in Bonn, London, Paris and Rome government has talked about the gas pipeline deal with this and the previdespite the content and clauses in civil law contracts between European and U.S. companies. Such private ous American administration. Patiently, we tried to explain that it does not make the West Europeans agreements, the concrete content of which still would have to be exadependent on the Soviet Union, either economically or politically; that it does not unilaterally benefit the Soviet Union; and that it is in the interest of Western Europe. We had reason to believe that the United States

mined carefully, cannot and must not alter the legal basis of international relations between states. Above all they must not retroactively block the execution of contracts that were concluded between the European companies and the Soviet Union long before the events in Poland. We shall have to continue talking about that with the U.S. administration. In America it is asked whether by

ous. The West European reaction to the embargo decision, however, should give the White House cause to this gas deal Western Europe, and especially the Federal Republic of Germany, will not become dangerously dependent on the Soviet Union. In Germany we have studied this issue extensively and carefully. this issue extensively and carefully, and in 1979 the government arrived at the conclusion that there is no

threat of such a dependence.

At the peak of gas deliveries from the Soviet Union, roughly 30 percent of our gas supplies will come from there. That will be about 5 to 6 percent of the supplies will come from the supplies will come from the supplier.

cent of our total energy consumption.

A disruption of deliveries can never be fully excluded, even for technical reasons. But for such an event we are well prepared: We have sufficient gas storage capacities; we have a flex-ible West European gas pipeline net-work, which would allow us to switch to other resources in the western parts of Europe; and we have the possibility of converting quickly from

gas to coal and oil in an emergency.
For more than 60 percent of its energy consumption, the Federal Republic depends on imports. The more we can diversify our imports, the greater our security of supply. So the deliveries from the Soviet Union will contribute to this. According to our findings, there is no need to worry.

Apart from that, we look for further imports from other countries. The percentage of Soviet primary energy supplied will decrease with the exploration and production from new sources in other countries. But such new sources for our gas supply will not be available before 1990, especially not in Norway.

In the United States it is often

thought that credits for the construction of the pipeline are subsidized by the government in Bonn. This is not true. The government does not grant credits or interest subsidies, either to the Soviet Union or to any other East bloc country. The credit arrangements are made by private banks, without any state support.

Thus there is nothing suspicious in this deal. This should be understood

everywhere. Especially on the ques-tion of credit subsidies to Communist countries, there is no difference between Bonn and Washington.

Therefore we are in full agreement with the communique of the Versailles summit. This is why I have striven in many rounds of negotia-tions in recent weeks to reach an agreement within the OECD to increase interest rates and shorten maturities for credits to the Soviet Union. We finally succeeded: All OECD countries, including Japan, have reached a consensus according to which minimum interest rates, which were only 8.25 percent last year, will now be raised to 12.15 percent. This is an increase of about 50 percent, and the maturities are decreased from eight to five years. I believe that this is the better way to indicate to Mos-cow that the Western reply to Poland is not "business as usual

We have no differences of opinion on the events in Poland. The declaration of NATO in January, 1982, was unanimous. But we do doubt that embargoes are an adequate answer. In my opinion, this applies to both the pipeline and the grain. . The Washington Post.

Davis - Energy Shultz - State

LETTERS TO THE EDITOR

Help in Return For many years the Israelis have

been the beneficiaries of much good advice from various British governments and the British press on how they should run their country and come to terms with their enemies. It is time Israel returned the compliment, what with all the difficulties Britain is experiencing.

1 am sure that Mr. Begin's ideas on

how the British should run their affairs would be welcome in London. The French would be next on the list of recipients of Israeli advice. BERTHOLD WYLER

Who Better?

Regarding "West Beirut in 1982 Is Like Tel Aviv in 1947" (IHT, July 24): Bravo, LF. Stone! Indeed, who should understand bomelessness and exile better than we Jews? We must help the Palestinians re-find their homeland - not exterminate them. CONSTANCE, J. TOMBERG.

The Insanity Defense

Regarding "Reasons Why Insanity Defense Makes Good Sense for Soci-ety" (IHT, July 27): Those of us who had the privilege of studying criminal law with Alan Dershowitz learned that society's purpose in imposing criminal sanctions is not merely to punish wrongdoers or to express its own selfish need for retribution, but also to deter other anti-social acts by the same or other individuals.

While no one can dispute that the insanity defense is integral to any civ-

ilized society, it is surprising to find Mr. Dershowitz sentimentalizing on the "moral basis of the criminal law" and distinguishing between beings deserving "punishment" and causes requiring "control." This distinction is valid only if criminal penalties are equated with punishment, to the exclusion of other social goals.
ALISON LERRICK

Capitalism Challenged

Is it not time, in the context of 30 million unemployed looking vainly for jobs and sufficient income, to draw the conclusion from the much talked about dispute over the Soviet gas pipeline that the sole remaining chance for capitalism in the West to survive a few decades more is to actively contribute to the economic consolidation and development of communist societies in the East? And that the sole alternative to this prospect seems to be, as it is seriously feared by a number of your contributors, to start a nuclear war?

And does not this — in spite of all scientific" assertions about its being disproved by history — bear out the core of Marx's predictions about the inevitable future of capitalism? K. CHAGLAR

Manila's Squatters

Regarding "Shacks Give Way to "City of Man" (IHT, July 3). I am frankly confused as to what Pamela G. Hollie expects of a developing country — whether we ride the donkey, walk it, or carry it on our shoulders. In any case, it sees

are blamed for even trying to come to grips with the monumental task of nation building. The writer's impe-lenting criticism points up the deplor-able conditions of Manila's illegal squatters and reproves the govern-ment for its efforts to relocate them.

The truth of the matter is that the vernment of the Philippines has embarked on a massive 10-year hous-ing program to provide annually 10,000 new homes for the poor and the lower-middle classes. Much of the area that is being cleared of squatters is to serve as homesites.

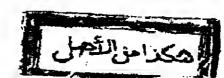

The government has successfully embarked on agricultural reform, giving the land to the tenants; urbail land reform is its next objective, to remove wealth and privilege from the landlords and return the right of abode to every Pilipino family. JOSE A. ZAIDE. Embassy of the Philippines.

\$3.25 Million Paid For Morse Painting

By Jo Ann Lewis

WASHINGTON — Daniel J. Terra, President Reagan's ambassador-at-large for cultural affairs and founder of the Terra Museum of American Art in Evanston, Ill., has paid \$3.25 million for "Gallery of the Louvre," a painting by the 19th-century artist-inventor Samuel F.B. Morse. It is believed to be the highest price ever paid for a work by an

Terra bought the 6-by-9-foot painting from Syracuse University, which received it as a gift in 1884. He said that negotiations with the university began in March and that the deal was closed this month.

"Gallery of the Louvre," painted in the Louvre in 1832, depicts several Americans viewing 38 paintings in the museum's Salon Carrée. Morse shows humself as teacher, leaning over a student's shoulder in the foreground; in the left corner are the novelist James Fenimore Cooper with his wife and their daughter, who was an art student of Morse's. Surrounding them are miniature reproductions of paintings by Rembrandt, Leonardo, Rubens, Raphael and Trian. The painting is in the tradition of "gallery" pictures painted between the 17th and 19th centuries.

The record price for an American painting sold at auction is \$2.5 million for Frederic Church's "Icebergs" in October, 1979, at Sotheby

"Gallery of the Louvre" was done in years after Morse's "The Old House of Representatives," now in the Corcoran Gallery of Art in Washington. Both were conceived as exhibition pieces that Morse hoped peo-ple would pay admission to see. Both failed to produce the expected accome, leading Morse to refocus his attention on what had been a hobby in scientific research. He later produced the telegraph and the Morse code, which ultimately overshadowed his accomplishments in art.

Terra is a self-made multimillionaire and founder of Lawter Interna-

tional Inc., a chemical conglomerate. As finance chairman for Reagan's campaign, he raised \$21 million. Terra owns other record-price paintings, including "The Jolly Flatboatmen" by George Caleb Bingham, which he bought at auction in 1978 for almost \$1 million. He and his late wife. Adeline, began collecting American art in the early 1950s, and in 1980 opened the Evanston museum. Terra recently acquired a prime corner on Michigan Avenue in Chicago, where a new museum is to be built to house the Morse and other paintings in the Terra collection.

L ONDON — Two large exhibi-tions — "A Century of Mod-ern Drawing from the Museum of Modern Art, New York" (Prints & Drawings Gallery, British Muse-um, Great Russell Street, to Sept. 12) and "Hayward Annual No. 5: 1982: British Drawing" (Hayward Gallery, South Bank, to Ang. 30) - give us an opportunity here to examine the place of drawing in contemporary art.

Both selections define a "drawing" in the widest possible terms, the New York museum as "any unique work on paper," the Hay-ward as "a work of art that would otherwise be categorized as a work of art that is not a drawing."

The New York loan show of 190 drawings chosen by Bernice Rose, curator of drawings at MOMA, in consultation with Frances Carey, assistant keeper of prints and drawings at the British Museum, is splendidly international, from an 1881, conté crayon drawing by Georges Seurat to a 1981 mixed media work, "Face Mask," by the

but more imaginative, exciting uses of drawing may be found, such as Louise Blair's mixed media. "In Love in Paris" and Laura American Bruce Nauman. The Hayward show of 300 works, selected by three artists, and Gillian Ayres; as well as Mark Francis of the Whitechapel Gal-lery and Frances Carey, from an open submission of more than 6,000, is exclusively works by living British artists, from the ink and watercolor "Aspects of HMS Victory" by Clarence Blackburn, born in 1914, to drawings by four artists born in 1960; Scott Kilgour, Anita

so that the artist may concentrate The New York show includes alon representing ideas and ideals." most all the great names of modern art — Boccioni, Braque, Bran-cusi, Picasso, Chagall, Miro, Kan-dinsky, Grosz, Tatlin, Schiele, Van Gogh, Cezame, Klee, Matisse. Three examples, by Gauguin, Ep-stein and Sheeler, illustrate the scope of draftsmanship.

Klein, Julia Haddon and Stewart

Gauguin's drawing of "Meyer de Haan," which shows the Dutchman as a Satanic figure, is no more than a working sketch for a painting made as a companion to a selfportrait as Lucifer, part of the dec-oration of Marie Henry's inn at Pont-Aven where Ganguin and his friends stayed when working in Brittany. The conte crayon drawing of a "Rock Driller" by Epstein ing of a "Rock Driller by Epstein is the outline of a concept, the moment of birth of Epstein's seminal bronze "The Rock Drill" (1913), now in the Tate Gallery here. Sheeler combines the precisionism for which he was famed with the surreal influence of his friends among the New York Da-daists in a "Self-Portrait" in which he protrays himself with the ut-most delicacy, as a mere reflection in a window pane at night.

The British artists at the Hayward show themselves no less versatile and varied in their approaches. Nudes, portraits, landscapes and cityscapes there are in plenty;

Paul Delvaux's "Hommage à Jules Verne" mixes many of his unmistakable elements at the new Delvaux museum in Belgium.

Drifting Through Delvaux's Dreamy Scenes

By Rona Dobson

SINT IDESBALD, Belgium —
Dream-drugged women drift
pale-fleshed and expressionless
through surreal landscapes; a
lighted, empty train stands in a
forest, almost overpowered by ranks of tall trees pressing menac-ingly close; a Jules Verne professor, standing amid an unclad crowd. adjusts his pince-nez - are all imperiously, unmistakably Del-

At the newly opened Paul Delvaux Museum, in a bouse by the sea near Ostend, such works are grouped in a casual profusion due as much to lack of space as to prodigality. Although it makes for an atmosphere of cocooped intimacy and separation from the world outside, there is no doubt that the paintings and other works would make a more gradual and reflec-tive impact with more elbow room.

"Work is going ahead to double the space we now have, but we particularly wanted to open in time for the summer visitors," said cu-rator Charles van Deun, who is also president of the Paul Delvaux Foundation and a nephew by marriage of the artist.

The foundation, after some discouraging tangles with bureaucracy, gave up plans to build a mnseum with public financing and instead bought a white Flemish bouse that most recently had been an auberge renowned for its pancakes. From signing the deeds through renovation to installation of the paintings and opening to the public took just two months," van Deum said, "My entire family helped ont. They had to, or they would have forgotten what I looked like." Van Deun lives in the neighborhood and so was able personally to oversee the work and organize the hanging of the 29 works, all donated by Delvaux from his private collection, with the promise of more to come.

coal fantasies) so clearly under-Paul Delvaux has long had his ing which has been freed by the imagination from realistic detail, summer home near Sint Idesbald, a coastal village-cum-resort that in the 12th century was a thriving center for the flax trade with Eng-

LONDON

land. Since it opened, Delvaux, who will be 85 in September, has been a regular visitor, dropping in several times a week and often having luneb at the museum cafeteria under an umbrella on the terrace. "I feel at home here," he said

contentedly.

The tables and umbrellas on the terrace, the green garden, the prox-imity of the beach all add a special allure; even the perspective of arches over the straight, paved path from the front door to the garden gate seems pure Delvaux. lacking only a female apparition sleepwalking nude down its length with lamp or candle in hand, Visitors, oblivious of the painter looking on, march briskly toward the

Inside, the lighting is geared to the Delvaux atmosphere of mys-tery, stillness and night fantasies. The artist likes to create confusion mixing incongruous elements. lt is part symbolism, part pure puzzle-picture. Against a background of superbly structured temple columns and Roman hills, a nude reclines in the open on a French period sofa, a Brussels tram glides past.

Homey touches and evocative hints abound for those in the know: A night scene whose central figure is a demure, youthful nude a model appearing in several works in this collection - sbows a stretch of cobbled street, a house and distinctive street lamp from the part of Brussels where Delvaux lives. A little suburban train that weaves through the same district in life becomes part of the pictured a formal park, unaware of the train chugging beside them.

A Jules Verne character, Professor Lindenbrook, is a Delvaux reg-ular, but the meticulous portraits of a thin-faced man in granny glasses and white coat is strictly Delvaux's private vision of him. He collects all the Jules Verne books," said van Deun. "The family sometimes send him special copies they find with Verne's signa-ture." The professor is always fully dressed among nudes that are often real-life portraits. Delvaux men look on in smug

security, armored in sober suits, at a stately parade of well-nourished, naked female flesh; but, despite their nudity, the women seem as decorously invulnerable as if surrounded by transparent walls. They are figures of awed, rather than erotic, fantasy, occasionally accompanied by adolescent male nudes. Another frequent subject is Delvaux's lively skeletons, which van Deun called his favorites; "They are not dead bodies, just people stripped of flesh carrying on in a normal, buman way."

The museum is open every day from 10 a.m. to 8 p.m.

Earliest Work From '20s

SINT IDESBALD (Reuters) -Delvaux did not turn to surrealism until the mid-1930s, when he was almost 40. The earliest work in the new museum is a view of a Brussels railway station in post-Impres-sionist style, done in the 1920s belandscapes, as in "Le Cortege." fore the artist came briefly under where women nursing oil lamps the influence of such Flemisb Expressionists as Constant Permeke and Gustave de Smet.
Delvaux said two "shocks" led

him in surrealism: "The first was a chance visit to a wax museum at the Brussels Fun Fair. I had been painting for 10 years in an Expresionist, naturalist manner and suddenly these wax figures struck a chord in me. The second impact was the Giorgio de Chirico exhibi-tion 1 saw in Paris, with its empty, silent suburbs inhabited by shadows. That was real poetry.

U.S. Gives Back 2 Dürer Works To E. Germany

The Associated Press

BERLIN - The U.S. government has returned two Albrech Dürer paintings "in remarkably good condition" to East Germany, 37 years after they disappeared from Schwarzburg Castle in U.S.-occupied Thuringia province, the East Berlin news agency ADN reported.

The paintings, done in about 1499, depict a wealthy Nuremberg citizen, Hans Tucher, and his wife, Felicitas. A 78-year-old American law-

yer, their last owner, told a New York appeals court that be had bought the works from a U.S. soldier in 1946 for \$450. The paintings are scheduled to be exhibited in Leipzig in September, ADN said.

Christie's Sales Dip Reflects Auction Ills

By Souren Melikian national Herald Tribune

ONDON - The end-of-season I ondon — the day of figures released by Christie's confirm the extent of a crisis that was forecast in this column a year ago. Christie's worldwide sales for the season ending today totaled £172.63 million (now about \$293.47 million), against £193.48 million for the 1980-81 season.

Nominally the drop is 10 percent. In real terms, it must be well over 15 percent given the continu-

THE ART MARKET

ing inflation in the United States, Britain and some other European countries. The score at Christie's is better than at Sotheby's, which, owing to its particular management crisis, registered a nominal drop of 25 percent and for the first time in its history is not releasing a full report

Although Sotheby's is still leading with net sales totaling £267 million. Christie's is clearly enjoying the situation. Its release gleefully points out that Christie's development program was entirely fi-nanced by the company's re-sources — a broad hint at Sotheby's indebtedness. It further con-gratulates itself for having cut the additional sale charge that buyers must pay on top of the knock-down price from 10 to 8 percent. The implication is that Sotheby's - which still charges 10 percent lost some prospective vendors by being too greedy.

But none of this can gloss over the basic facis - the setback. Where Christie's does score a point against Sotheby's is in its outspocenness, lts detailed figures provide an insight into the pattern of the crisis that Sotheby's skimpy interim report does not. The first noteworthy figures

concern the comparative drop in the United States and Britain, where net sales totaled £67.585 million and £79.657 million respectively, compared with £74.03 million and £85.037 million last season. The deterioration was more marked in the United States, where the art market is traditionally more sensitive. The explanation that springs to mind - high interest rates - is probably the wrong one. These affect bigh-powered investors on both sides of the At-

The difference is not due to investors but to the medium-income category that buys for plea-sure and seems to feel far more insecure in the United States than in Europe. One field, however, is spared by the American fit of depression — American paintings, up from £4.69 million last season to £5.148 million. This market has been booming in the past few years and is the last category likely to give in. For the time being, it has lost nothing of its momentum. Contemporary paintings, recovering from a previous depression. have risen spectacularly from ing now.

£3.69 million in £4.845 million. mostly due to the United States. according to one Christie's source.

By and large, departmental breakdowns indicate that topnotch categories have been worst affected. Old master paintings — a definition that included the 19th century up to but excluding the Impressionists and other avantgarde trends later in the century—have dropped from £29.88 million in £25.158 million, and Impressionists posedived from £29.437

million in £17.096 million. These figures can be read in many ways. The most obvious one is that great works are increasingly rare and that the enormous reserve prices siapped on the second or third-rate works that remain often turn buyers off - rightly so.

"We did not have the Poussin," said a highly placed Christie's source, referring in the £1.65-million masterpiece "Flight into Egypt" now owned jointly by the Simon Norton Foundation at Pasadena, Calif., and the Paul Getty Museum at Malibu. "But many world records were established." That's it in a nutshell: the record prices were paid, in a majority of cases, for paintings that were definitely not the artists' best.

Buyers are becoming painfully aware of this, and something has in give. Either the reserves go down or the buyers give up. This season, the latter option was the more frequent one, as reflected in the high bought-in ratio. Next season it will have to be the former. Reserves have become unrealistic and have to be slasbed. It is no accident that the category that is most spectacularly up is one in which the highest quality still turns up at auction — Chinese and Oriental works of art. Net sales there have jumped from £5.2 million to

The also applies in European porcelain, which progressed nominally from £5.2 million to £5.5 million, almost keeping up with inflation. The more favorable score registered by Far Eastern art is proba-bly to be accounted for by the better economic situation of Hong Kong and Japan, the two main outlets for top-quality Chinese porcelain. The overall image that emerges

is of a market not much affected by the economy but hit by internal troubles. The supply crisis is a fun-damental problem with no real solution. The art of the past, once put away in museums, is not re-placeable. The idea that one category can be substituted for another is a myth produced by people more accustomed to considering manufactured products than art. People go on buying, but oot at the same prices. Prices have to be readjusted, vendors' ambitions lowered, the wbole structure thought oot afresh.

That is exactly what is bappen-

Slurry Pipelines

New York Times Service

WASHINGTON — The House Public Works Committee, overriding vigorous opposition from the railroad industry, has passed legislation that would give developers of coal slurry pipelines the power to order the sale of property sought for rights-of-way. A similar measure is pending in the Senate Energy Committee.

The legislation could provide a boost to pipeline activity and create new competition for the railroads, which have a monopoly on coal hauling in some areas. Although it is nunsual for private companies to be given the power of eminent domain, it has been done before. The nation's railroads once had eminent domain, and some utilities and pipelines have it now.

Coal slurry legislation, which has been discussed for 20 years, has at times cleared various committees, and once it was even passed by the Senate. It has not yet become law, but its proponents say this year offers their best opportunity so far for success.

Approval of the bill in the House committee late Wednesday night, by a vote of 25-21, is

Approval of the bill in the House committee late Wednesday night, by a vote of 25-21, is an important step toward greater competition for the transportation of coal, said Carl E. Bagge, president of the National Coal Association. The odds that both houses of Congress will enact the measure in the current session appear to be sim, however, if only because few working days remain on the lawmakers calcadar.

appear to be slim, however, if only because few working days remain on the lawmakers' calculated.

Eight slurry pipelines are now on the drawing board or in some stage of construction, industry sources said, with most of them do signed to han pulverized coal from the interior of the country to electric plants and seaports.

Lined up in favor of the coal shurry legislation are the pipeline operators, electric utilities, much of the coal industry and some consumer groups. Lined up against it are the rail roads, environmentalists, farmers and Western states that fear a drain on meager water supplies. Operating a shurry pipeline requires great amounts of water to move the pulverized coal.

The passage of railroad deregulation legislation in 1980, with its emphasis on competition, makes singry pipelines a new factor in the coal handing business, said Edwin R. Anthony 3d, a spokesman for the National Coal Association.

"Utilities and other coal customers often are captive to a railroad," he said. So the pipeline is an alternative to other modes of transportation."

More than half of the electric power used in the United States comes from the burning of coal, he noted. "Transportation costs are a large portion of the total costs of buying and using coal," he said.

Richard E. Briggs, executive vice president of the Association of American Railroads, argued that slurry pipelines would not generate new business and would merely replace railroads as the carrier, causing memployment.

BUSINESS BRIEFS

UAW Plans Meeting With Harvester

DETROIT — The United Auto Workers union says it will meet with International Harvester representatives Monday "to discuss what other steps may be taken to soften the impact of the [company's] restructuring

The union, which represents 20,000 active and 10,000 idled employees at Harvester, said Thursday the restructuring plan — consolidation or closures of several company facilities — did not come as a surprise.

The UAW intends to insure that its members at International Harvester. vester receive all the rights and benefits they are entitled to under the collective bargaining agreement," a union official said.

Petro-Canada Sees Offshore Rights

CALGARY, Alberta — Petro-Canada is expected to get exclusive offshore exploration rights to at least 4 million acres from the Canadian government, sources at the government-owned corporation said Friday. Energy Minister Marc Lalonde is expected to announce the award Saturday for the rights, which cover a region about 80 miles northeast of the eastern tip of Sable Island in the Atlantic Ocean.

Petro-Canada will be the operator and will hold a 50 percent in the venture, along with Bow Valley Industries and Husky Oil, the sources said. They added that eight wells must be drilled by 1985 under the

Arbed Asks Increased State Stake

LUXEMBOURG — Emmanuel Tesch, president of Arbed, has proposed that the Luxembourg, Belginn, France and the West German Saar state take a stake, or increase their interests, in the steel company to raise urgently needed capital, Finance Director Norbert van Kumirzki said

Friday.

France already has a 12 percent stake in Arbed, Luxembourg's principal industry. Beigium holds 22 percent of Sidmar, Arbed's coastal steelworks in northern Belgium. Neither Luxembourg nor the Saar, base of the Arbed-Saarstahl subsidiary, has an interest.

Arbed last year lost 3.18 billion Luxembourg francs (\$68 million), the seventh consecutive year it lost money. The company is engaged in a 28 billion franc restructuring program. Pierre Werner, prime minister of Luxembourg, responded coolly to the proposal, saying the government had taken no firm position on it. had taken no firm position on it.

Gulf Plans Appeal on Cities Bid

Compiled by Our Staff From Dispatches
WASHINGTON — Gulf Oil,
temporarily blocked by a federal
judge from buying 41.5 million
shares of Cities Service, Friday extended until Aug. 9 its offer for the
shares and said it would appeal the
rolling.

Judge Charles R. Richey in the U.S. District Court Thursday signed a restraining order barring Gulf for at least 10 days from buying the Cities Service shares, a transaction that would have to-taled \$5 billion.

The court acted in response to a request by the Federal Trade Commission for an order holding up the Gulf bid to buy Cities Service until the agency can study suspect-ed antitrust implications of the merger, the third largest in U.S. history

contest the FTC action vigorously, but et the same time seeks to discuss with the FTC whether there is a reasonable basis for the prompt

settlement of the action."
Gulf did not say how it plans to contest the FTC action. Gulf said it. "could determine to terminate the offer at any time during the course of the litigation or the settlement discussion."

The FTC has 10 days to persuade the court to issue a formal injunction barring the merger until the FTC can conduct a complete investigation of the antitrust as-

pects of the huge merger.

Analysts speculated that Gulf's management may be uneasy about the finances of the proposed merger. Worries that the purchase price would strain Gulf's financial re-sources caused Gulf stock to decline and its credit-rating to be cut after the deal was announced in

In addition, analysts suggested, Gulf management may be con-cerned that the expected congressional repeal of a tax provision that can benefit merging compa-nies will adversely affect the merg-er with Cities Service,

According to a statement read in open court from Herbert Wachtell, a New York lawyer for Cities Service, the Tulsa oil company was "unable all day to communicate with Gulf Oil" to discuss Wednesday's events, where the FTC voted unanimously to try to block the purchase of Cities Service by Gulf for antitrust reasons. The two companies had previously agreed upon the stock purchase and merger, so it had been viewed as a "friendly"

In his statement, Mr. Wachtell said that in the absence of any opportunity to talk to Gulf, "we must take an independent position on this matter." The company, said, opposes the issuance of a restraining order, at least partly to protect the interest of its shareholders, most of whom have tendered their shares to Gulf for the \$63 offering price.

In response to a question from Judge Richey — In the absence of a restraining order, do you plan to go forward with the stock purchase after midnight tonight according to your agreement?" — Donald Kemp, the Gulf lawyer, said: "No, I am not in a position to say whether we would go forward and buy the stock tonight."

At another point in the exchange, Gulf lawyers said they had a sufficient amount of stock tendered by Cities Service shareholders

U.S. Carmakers Are Back in Black But the Market Remains Depressed

By John Holusha New York Times Service

DETROIT - With second-quarter earnings out, the major U.S. carmakers appear somewhat healthier. General Motors Corp. and Chrysler Corp. earned more than had been expected, and Ford Motor Co.

had its first profit in a year.

But the earnings reflect a shrinkage of operations.

GM, which oot so long ago had billion-dollar quarters, is not even expected to reach that total for the year. The industry is halfway through its fourth year of recessioo — depression is the term used here th little indication that the public plans to return to the showrooms soon.

Iodustry leaders and analysts expect that total sales this year will amount to as few as 8.2 million cars, imports are expected to total 2.2 million, which would leave the domestie industry with barely 6 million cars, the least since 1961. And inventories stand at a 78-day supply; 60 days is the comfortable norm. Glandular Enthusiasm

Even the glandular enthusiasm of Detroit's super-salesmen has been worn down, "I have no reason based on economics to become bullish on 1983," said

E.T. Pappert, vice president of sales for Chrysler. "We've got exorbitant interest rates, and the highest unemployment since the Depression. What can you Robert Lund, the unfailingly upbeat marketing vice

president at GM, sounds puzzled by recent events.
When you look back, it shouldn't have happened the way it did," he said. "There's a lot of money out there and a oeed for cars and trucks."

There were, as usual, bright forecasts for 1982, based on an assumption that the economy would pick

up by the spring quarter. But the upturn remains on

the horizon. "The recovery has been six months away on a rolling basis for 30 months now," Mr. Pappert observed.

Detroit, in fact, has not had a good year since 1978, then it sold 9.3 million cars. The gasoline shortages that followed the revolotion in Iran the next year cut sales to 8.2 million cars, and the ensuing economic shamp reduced them to 6.5 million in 1980 and 6.2 million last year.

GM, despite retaining its 60-percent-plus share of the market for domestically made cars, is rated by industry analysis as the biggest loser in the downturn.

The company introduced an unprecedented oumber of products, any one of which would have been a major effort in the past, to a stunning lack of re-

sponse from buyers.

GM's oew J-model subcompacts — the Cavalier from the Chevrolet unit, the J2000 from Pontiac, the Skyhawk from Buick, the Firenza from Oldsmobile and the Cimarron from Cadillac — have oot sold. The A cars, midsize family autos of the type that have paid the rent at GM since the 1930s, are piled up in

The new models, said Maryann N. Keller, an analyst with Paine Webber, "simply did not do what new models are supposed to do: bring in customers and build an order backlog."

The slump has put 200,000 production workers on the layoff list, forced the United Automobile Workers

union to accept cuts in pay and benefits and cost tens of thousands of white-collar jobs.

Engineers, salesmen and office workers no longer find their futures secure. State and local governments

in the Midwest are struggling to trim services to keep their budgets in balance. Ways of doing business have been changing rapid-

Fed Again Trims Its Discount Rate; U.S. M-1 Declines

Compiled by Our Staff From Dispatches WASHINGTON - The Federal Reserve Board, for the second time in as many weeks, Friday cut the discount rate it charges on loans to member banks to 11 percent from 11½ percent.

The Fed said the rate reduction, effective Monday, was made "in light of market interest rates and relatively restrained money and credit demand." Wall Street analysts said the drop in the rate, which was announced after the market closed, apparently took

investors by surprise.
On July 19, the Fed lowered the discount rate to 111/2 percent from

The Fed also said that the basic measure of the U.S. money supply, M-1, fell \$800 million to \$450.8 billion in the week ended July 21. Analysts had expected a modest decline in M-I, with estimates ranging from \$500 million to \$1 billion.

The \$100 million drop in M-1 reported last Friday for the week ended July 14 left the measure around \$500 million below the upper end of its 21/2 to 51/2 percent annual growth target range. The Fed revised last week's report to show a \$200 million decline.

The Fed's reduction of the dis count rate was requested by the Federal Reserve banks of Boston, New York, Philadelphia, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco. The vote was 4-0, with

three members absent. The Fed move came as the Mel-lon Bank cut its prime rate to 15 percent from 15½ percent, a rate that has become widespread through the banking industry.

Also, credit markets have con-

tinued to exhibit strength on optimism over Treasury borrowing ability and a declining federal Fed funds traded at from 11% to

11½ percent Friday after an average 11.71 percent Thursday, deal-Equally important, dealers said

their finance rate remained quite positive, enabling them to carry larger inventories of Treasury pa-per. The dealer finance rate ranged from 9% to 10 percent, well below the yields on their inventory. This means that dealers cur-

rently are earning between 100 and

In another indication of eco-

single-family homes in June declin-

ed 14 percent to a seasonally adjusted annual rate of 343,000 after

rising 17 percent in May to 399,000. Earlier, the department

put the May increase at 13.3 per-

cent. The June figures showed a

200 basis points, or even more, on their inventory, and this permits them to absorb larger amounts of Treasury paper," said William V. Sullivan Jr., senior vice president and chief economist et the Bank of New York. A basis point is a hundredth of a percentage point.
The dealer finance rate is deter-

mined by the repurchase agreement market.

Repurchase agreements are collateralized loans. Dealers, in effect, pawn their government securities for brief periods with corporations and others interested in lending cash to them for a few days.

While the dealer finance rate was from 9% to 10 percent, the current 90-day Treasury bill yield is 10.5 percent, and the yield on the six-month bills is 11.35 per-

"Many banks are still reluctant to sell certificates of deposit because they think rates may ease a bit further," said Thomas G. Gribbon, executive vice president of Drexel Burnham Lambert Govern-ment Securities. They prefer to tap the overnight federal funds market for their needs in the meantime. This practice has tended to tighten the fund rate in re-

NYSE Prices Decline in Slow Trading

NEW YORK — Prices on the New York Stock Exchange closed lower Friday in lifeless trading as investors engaged in some profit-taking amid continued concern about the economy.

The Dow Jooes industrial average fell 3.61 to close at 808.63, after advancing slightly in the morning. Declines led advances, 7-to-5, as volume slowed to 39.3 million shares from the 55.7 million traded Thursday.

Analysts say investors continue to be concerned about poor forecasts for the ecocomy. A lack of growth in the leading economic in-dicators and the White House's forecast of a \$115 billioo 1983 federal deficit caused concern, they

Harvey Deutsch of Purcell Graham said the stock market coo-tinues to be troubled by a "lack of credibility in the administration's

economie policy."

He said any market growth continues to be tied more to technical factors than investor optimism. Friday's early rally was a boldover

from Thursday's late push, analysts said. Mr. Deutsch said another technical rally is oot likely unless the

Dow average falls to around the 800 level. Henblein, the most active issue,

AEG Gives Bonn Outline for Sale Of Telefunken to Grundig, Banks

Compiled by Our Staff From Dispatches
FRANKFURT — AEG-Telefundeen Friday outlined its plan to hand over controlling interest in its home entertainment unit to Grundig and a banking syndicate by the end of the year. Under the first step of the plan presented to the federal Cartel Off-

bos :

ice, AEG would transfer a 51 per-cent stake of the capital of Tele-funken, worth 100 Dentsche marks (\$40.8 million), to a holding company now being formed. AEG would retain a 49 percent interest in the holding company with a 51 percent stake going to Grundig, another West German maker of radios, television sets and stereo equipment. Grandig then will take over management of the

Telefunken. The remaining 49 percent of Telefunken would be offered to a group of banks. Talks with the banks will take place within the

next few days, AEG said. The operation would reduce AEG's share in Telefunken from 100 percent to 24.99 percent. Giving up a controlling interest in Telefinken to Grundig "guarantees a future for the West German home entertainment industry, AEG managing chairman Heinz

Dürr said. The federal Cartel Office in Berlin confirmed it had received AEG's application, but a spokesman said he was skeptical.

"The application poses poten-tially grave problems for West Germany's market balance," the spokesman said. He said maintaining competitive conditions in the home entertainment industry will be the primary concern of the Cartel Office during its review of the

panies have connections with for-

ticularly on these relations in the fields of video recorders and color television sets," the spokesman Under West German law, the cartel office must reach a decision

Greek Shipping Faces Problems

A record 482 ships totaling 12.03 million gross registered tons, roughly a quarter of the fleet in tonnage terms, is laid up, and Merchant Marine Minister George Katsifaras said Friday the number will rise to at least 1.000 by the end of the year.

Friday the number will rise to at least 1,000 by the end of the year.

Prospects in both the tanker sector, which accounts for 37 percent of Greek registered tonnage, and dry cargoes, accounting for 61 percent, will remain bleak for the rest of this year and probably most of 1983, he said.

Of ships laid up, 133, comprising 8.37 million tons, are tankers, while 349, totaling 3.65 million tons, are dry cargo vessels.

Sources close to the Union of Greek Shipowners said they saw no prospect of an upturn in shipping business before next year.

A recovery, which would probably be led by tankers and trade in basic raw materials such as iron ore, might only be patchy and not nec-

tankers and trade in basic raw materials such as iron ore, might only be patchy and not necessarily sustained.

The union said one factor that has eroded Greek competitiveness on the world's depressed freight markets is an increase of more than 400 percent in Greek seamen's wages in the past eight years. The union is stepping up pressure to be allowed to hire more foreign seamen—the limit is currently 25 percent per Greek-registered ship — and negotiate separate wage agreements with foreign seamen's unions.

U.S. Authorizes Selling of Satellite Channels

By Penny Pagano
Los Angeles Times Service

WASHINGTON —The Federal Communications Commission has authorized the first sales of channels on communications satellites, a move that will allow private businesses to buy, rather than lease, slots on the satellites.

By a 6-1 vote Thursday, the commission approved plans by Hughes Communications Inc., RCA American Communications Inc. and Western Union Telegraph Co. to sell a total of more than 100 satellite channels, also known as

The commission said that permitting immediate sales of individual channels will stimulate compontion in the industry by providing a new way for satellite owners to obtain capital. In addition, the FCC said that the decision will make it easier for new satellite operators to enter the field.

Satellite users will benefit, the commission said, by being assured permanent access to a designated channel at a fixed price. The FCC said that transponder sales also will help small users that are unable to afford present leasing ar-

rangements; by buying a slot, they could qualify for tax benefits. To deny these arrangements would thwart the expressed needs of many consumers and satellite operators alike," the commission

sion emphasized that it would rule on each satellite operator's sales proposal on an individual basis. Clay T. Whitehead, president of

Los Angeles-based Hughes Comconcept of transponder sales, said in a statement that the FCC's decision "will have a very positive effect on the expansion of new telecommunications services."

In an interview, Mr. Whitehead predicted that initial purchasers will include cable TV pro-grammers that want a great deal of satellite capacity and want to be guaranteed satellite time when hey need it.

He also sees an even larger demand for channels from small businesses, particularly specialized carriers that cannot afford to build their own systems but want to offer alternative telephone and data transmission services. "That's

going to be the most exciting use," the structure and operation of the Mr. Whitehead said. the structure and operation of the new service — which allows large amounts of data to be processed in small electronic packages — might violate the FCC's plan for AT&T to restructure its operations. FCC officials said that they expected AT&T to file immediately for the proper license and that they would

> An AT&T spokesman said the company is distressed by the FCC's action because the proposal had been at the FCC for five months. "If they had told us this five months ago, we could have cleared this up," he said.

rule on the matter by year-end.

French Funds Outflow Up

PARIS — Outflow of capital from France tast year rose to 17.5 billion francs (\$2.6 billion) from 7.5 billion in 1980, a French parliamentary report said Friday, ft of-fered three reasons: Speculation against the tranc following the Socialist victory; evasion of new tax-es by holders of French francs; and the attraction of the dollar resulting from last year's increase in

.Ioblessness In Japan at 16-Year High

TOKYO - Strains in Japan's economy were underlined Friday by figures showing a twofold in-crease in the first half balance-of-payments deficit and unemployment at the highest level in more

than 16 years. Despite the country's large surplus in trade, the balance of payments for the first half was in defi-cit by \$6.67 billion dollars, three times that of the previous year, the Finance Ministry said.

Officials said the sharp decline in the yen's value on foreign exchange markets and the higher interest rates available overseas have caused an exodus of capital. Io addition, foreigners have reduced their investments in Japan, especially on the weakening Tokyo stock market.

The deficit in the long-term capital account, a major measure of fund movements in and out of Japan, widened 44 percent from a year before.

The merchandise trade surplus during the balf showed a 10 per-cent rise to \$7.57 billion; a 3 percent drop in exports was more than offset by a 4.4 percent drop in

For June alone, the current account - which measures merchandise trade plus such "invisible" items as tourism and shipping, along with certain transfer payments — was in surplus by \$1.74 billion, compared with sur-pluses of \$1.32 billion a year earli-er and \$76 million in May, The balance of paymeots in June regis-tered a \$1.47-billion deficit, compared with a surplus of \$1.27 billion in May and a \$954-million deficit in June, 1981.

Officials showed concern at the June rise in unemployment to 2.3 percent and said the figure would be double that if Japan used the same definitions as those em-ployed by other advanced countries. The officials said, for example, that someooe working only ooe hour in the two weeks before the survey would have been count-

ad as employed.

The officials said the June job-less figure of 1,37 million, the high-est since March, 1966, reflected the sluggishness of the economy, uoable to rely for support oo booming exports as in past years. Exports in June fell 7.3 percent.

(Continued from Page 7)

ly. Chrysler is heavily dependent on its Japanese and French affiliates for products and technology. Ford draws on its successful foreign operations for capital, and even mighty GM is planning to import Japanese-made cars.

Ioterest rates have had a double-

barreled effect, according to indus-try leaders and analysts. On one side, the decline of inflation increased the real cost of borrowing to buy a car. On the other, consumers had easy access to highyielding investments for any spare cash they held.

There have been some bright spots for industry, however. Among them are GM's sleek new sports cars, the redesigned Chevro-let Camaro and the Pontiac Firebird. Production lines have been running overtime, and dealers had only a 29-day supply of Camaros and a 22-day supply of Firebirds.

Then there are the small pickup trucks, until oow the exclusive province of Japanese manufactur-ers. GM's Chevrolet S-10, Ford's Ranger and Chrysler's Dodge Rampage, all new offerings, in-creased domestic truck sales 19 percent during 1982's first half while imported truck sales fell almost 18 percent.

Chrysler also chalked up a small success with its revival of the convertible, booking 20,000 orders for the Chrysler Lebaroo and Dodge 400 in six months. It had originally planned to make only 3,000.

This year's poor sales are not likely to produce the enormous losses of 1980, when the sudden drop struck companies staffed for

all-out production. The domestic industry that year lost a combined \$4 billion, including the first yearly loss for GM since the 1920s. Las year, the combined loss was \$1.3 billion, and 1982 is expected to bring a modest profit — the result of the layoffs, plant closings and leaner inventories, as well as high-

er car prices. Auto executives insist that fundamentals will eventually force buyers back into the market.

The average age of cars in use is approaching seven years. Some say there is a "pent-up demand" for as many as 8 million cars, the oumber that would have been purchased, they calculate, if sales had fol-lowed historical trends. Others, however, speculate that some basic buying habits have changed,

The outlook for Japanese imports, which amount to about 80 percent of all imported cars, is also cloudy. The Japanese are heading into the optional third year of their 'voluntary" restraint agreement. 'The Japanese will sell all they can bring in," Mrs. Keller said. "The only question is whether they will sell them at \$6,000 each or \$8,000."

Reduce Base Rate On Loans to $11\frac{1}{2}\%$

LONDON — Britain's major banks cul their base lending rates from 12 percent to 11½ percent, they said Friday. It was the second half-poiot cut announced this

Lloyds Bank was the first to announce the cut effective at the close of business on Monday, Aug. 2 and the remaining three clearing banks, Barclays, Midland and National Westminster, quickly fol-

The British banks had cut their base rates, the key to all bank lending in this country, on July 14 from 12.5 percent to 12 percent.

The announcement of slightly easier credit costs had little affect oo the London Stock Exchange as brokers were closing up for the end

But Sir Terence Beckett, director general of the Confederation of British Industry, which represents almost all of British business, hailed the move, "We welcome the further easing of cost pressures of business provided by the cut in in-

terest rates," be said in a state-

International Executive Opportunities

Senior Computer Roles in Banking Kuwait

Tax-Free Salaries

This leading Middle East Bank has an outstanding growth record in domestic and international markets. There are ambitious plans for further development of its existing on-line retail system including ATM's and the most modern branch automation equipment. In addition there are major developments planned in wholesale and international banking systems.

The bank now wishes to strengthen its existing multi-national systems department and the positions offered provide excellent opportunities for career enhancement and substantial capital accumulation in a challenging environment. All positions carry tax-free salaries and an attractive benefits package commensurate with these senior overseas appointments including bonus and generous paid annual holidays. Please write - in confidence - giving full career and personal details to G. E. Yazigi quoting the appropriate reference.

Senior Manager/Systems Development Up to US\$70,000

Will be responsible for the direction and control of all systems analysis, design and development for the bank's NCR and IBM mainframes. Candidates should have substactial experience at senior level in multi project management probably with a financial institution. Ref. CD.1036/5.

Senior Banking Analysts

Up to US\$45,000

Responsibility will be for supporting the bank's computer development in banking operations procedures, methods, training and implementation. Candidates will have had several years' relevant banking systems experience, probably gained in modern branch automation, ATM's, or accounting systems. Ref. CD.1036/6.

There are other positions available for less experienced candidates. Ref. CD.1036/7.

BOOKS

UNCIVIL LIBERTIES

By Calvin Trillin. 206 pp. \$10.95 Ticknor & Fields, 52 Vanderbilt Avenue, New York, N. Y. 10017.

Reviewed by Jonathan Yardley

CALVIN TRILLIN, who since 1978 has been writing a "humor column" for The Nation, is quick to recognize the risks of his assignment:
"In modern America, anyone who attempts to write satirically about the events of the day finds it difficult to concoct a situation so bizarre that it may not actually come to pass while his article is still on the presses." What is even more bizarre is the very notion of humor in the solemn pages of The Nation, a contradiction in terms if ever there was one. Yet, as many of the four dozen pieces collect-

ed in "Uncivil Liberties" attest, Tril-

lin has brought it off.

At the outset, Trillin defined the column as "a thousand words every three weeks for saying whatever's on my mind, particularly if what's oo my mind is marginally ignoble." He granted himself broad journalistic license: "I must admit that in these columns I haven't made a fetish of the old traditions of journalism - the tradition, for instance, of covering events only when they actually occur. . . I am also free from whatever traditions journalism might retain in the area of fairness and civility." Thus well armed with wit and malice, he went right to work, conjuring up in his very first column "a remarkably prescient H.L. Mencken quotation that seems to have been making the rounds of Washington egghead circles lately":

"On those dark moments when I fear that the Republic has trotted before these weary eyes every carnival act in its repertoire, I cheer myself with the thought that someday we will have a president from the deserts of the Deep South. . . . The president's

porch of the White House to swill beer from the bottle and snigger over whispered barnyard jokes about the darkies. The president's cousin, LaVerne, will travel the Halleluyah circuit as one of Mrs. McPherson's soldiers in Christ, praying for the conversion of some Northern Sodom's most Satanic pornographer as she waves his work — well thumbed — for all the yokels to gasp at... The president's daughter will record these events with her box camera. . . The incumbent himself, cleansed of his bumpkin ways by some of Grady's New South hucksters, will have a

barm comparable to that of the leading undertaker of Dothan, Alabama." That paragraph, in which Trillin can fairly be said to have out-Menckened Mencken, became an instant classic - as well as a source for further irreverence in subsequent columns, in which Trillin took oo such weighty matters as journalistic credibility and the protection of sources, and reduced them to the puddles of silliness they so often can be. Wrap-

ping himself in a mantle of feigned

self-righteousness, he took oo one-by-

one the members of the press who

questioned the authenticity of the Mencken quote, including one who clearly had found him out: "When I told one of them, Theo Lippman Jr. of The Baltimore Sun, that I had seen the quotation typed on a piece of paper rather than printed in a book or magazine, he asked if the piece of paper had been in a typewriter at the time. Such are the excesses of skepticism that respectable members of our trade have been driven to in

this post-Watergate era."

As should by oow be evident the temptation to quote Trillin is entirely irresistible. On the grounds that humor yields more to quotation than analysis, I offer these further gems from the Trillin lode:

 "The deduction for charitable contributions is simply the govern-ment's way of indicating that rich people are in a better position than poor people to decide which eleemosynary institutions are deserving of the taxpayers' support. Why vould coal miners be required to share the cost of a stockbroker's gift to the St. Paul's School's boathouse fund? The laws providing tax shelters reflect the strong philosophical com-mitment of the Founding Fathers, particularly Alexander Hamilton, to the principle that the public good would be served if dentists owned cattle ranches."

 "The presence of Carter in the White House, of course, is based on the belief that the proprietor of any middle-sized agribusiness can rise to the presidency if he simply works bard, studies at night with his wife to broaden their cultural horizons and keeps a low profile during civil-rights disputes.

 "Although a full week has passed since First Lady Nancy Reagan re-sumed her regular schedule, the White House remains unsuccessful in its efforts to still rumors that the cause of her brief absence was an operation for the surgical removal of her adoring

As these passages make clear, the amiable Trillin can be a very tough customer. He is never more so than in this imagined passage from the under-graduate Harvard diary of Arthur Schlesioger Jr.: "Dear Diary, Today I asked those cool Kennedy boys again if t could play in their touch football game on the quad and they said again that I was a wonk and a weenie and a wimp and a grind and walked like a duck. I told them that someday I would be a famous historian and if they ever let me play with them then I would write whatever they wanted me to write." Poor Schlesinger may never again be seen in public.

Malice may not be nice in political bumor, but it is necessary — and Tril-lin possesses it in ample measure. The persona he has adopted as bumor columnist is that of a "sausage-eating, slothful crank" who views the world with unflagging irritation and a pro-found understanding that things can, and will, only get worse. In his jaun-diced view, Julie and Tricia Nixon looked pretty terrific by comparison with Nancy Reagan, and Billy Carter made him yearn for Donald Nixon. The good old days really were better.

But with Trillin around it is all a good deal more bearable. Even in his less-inspired efforts --- these tend to be the ones in which his wife and daughters figure, further proof that family matters are best kept that way - he is perceptive, funny and iconoclastic. There's nothing quite so refreshing as a grump, and Calvin Trillin is clearly a grump for the ages.

Jonathan Yardley is on the staff of The Washington Post.

Compiled by Our Staff From Disputches MONTREAL - Andre Dawson doubled to lead off the 10th iming and scored on a bases-loaded sacrifice fly by Tim Wallach to give the Montreal Expos a 4-3 come from behind victory Thursday night over the St. Louis Cardinals.

Dawson doubled off Doug Bair and went to third on a throwing error by Willie McGee, the center fielder. Bair intentionally walked

BASEBALL ROUNDUP

Al Oliver and Gary Carter to load the bases with none out and retired Warren Cromartie on a pop to short. But Wallach followed with his sacrifice fly to center to score Dawson easily.

Phillies 3, Cubs 2

In Philadelphia, Gary Matthews drove in the decisive rim in the seventh inning to lead the Phillies several mining to lead the rimines over Chicago, 3-2. Mike Krukow, making his first appearance against his former teammates, picked up his 10th trimingh in 16 decisions, equaling his career high for victories in one season. The Phillies' Manny Trillo, who set a

tive errorless games in a season by inning following singles by Chris a second basemen, extended the Chambliss and Bruce Benedict. streak to 88 games.

Pirates 4, Mets 1

In New York, Don Robinson pitched a seven-hitter and Dick Davis hit a two-run homer as Pittsburgh best the Mets, 4-1: Davis. starting for the injured Dave Par-ker, homered in the fourth inning off Pete Falcone after a double by

Astros 4, Reds 3

Bill Madlock

In Houston, Phil Garner's ninth home run of the season broke a tie in the eighth inning and powered the Astros to a 4-3 victory over Cincinnati. Garner hit his homer off the left field wall just above the home-run stripe in the Astrodome.

Braves 6, Padres 2

In Atlanta, Dale Murphy, the major-league home run leader, hit his 27th and 28th homers of the season and Jerry Royster had a two-run triple as the Braves defeat-ed San Diego, 6-2, and stretched their lead to nine games over the for victories in one season. The Padres in the National League Phillies' Manny Trillo, who set a new record Tuesday for consecutive right-field corner in the fourth

U.S. Swimming Hopes Still Hinge on Caulkins

GUAYAQUIL, Ecuador — The last time U.S. swimmers attended en had won 12 of 13 races. a major international meet, Tracy Cantkins was the star of a resurgent team of American women.

Four years later, U.S. hopes of upsetting the strong East German contingent next week at the World Swimming Championships hinge heavily on the 19-year-old from Nashville, Tenn, who has won more national titles than any American swimmer in history.

Thirty-nine times since 1977, Caulkins has reached the final wall first in individual events at national championship meets, which are held twice a year. Because of the U.S. boycott of

the 1980 Olympics at Moscow, the last time American swimmers chalio an Olympic (50-meter) pool was the 1978 World Championships at West Berlin.

Caulkins, then 15, won three individual gold medals; one silver and two relay golds as the U.S. ley in the 200 butterfly; Mary T. women won nine golds to one for Meagher in the women's 100 and women won nine golds to one for the East Germans. In the 1976

There really wasn't much for us to lose, as most of the Europeans didn't expect us to do that well." Caulkins recalled. "I think we really shocked them."

No Shocks Expected

There's little chance that Caulkins will shock anyone in the 1982 World Championships. World re-cords in the events Caulkins dominates in the United States - the 400-meter and the 200-meter individual medleys — are held by East Germans: Ute. Geweniger and Petra Schneider, respectively.

About 1,200 athletes from 56 countries are in this Pacific coast city of I million for the champion-

women's 1,500 freestyle.
The opening ceremonies for the
World Aquaic Games — which include intemational competition in diving, synchronized swimming and water polo in addition to swimming - were held Thursday. Friday's agenda included prelimi naries in diving synchronized swimming and water polo. Swimming competition starts Sunday with the women's 100 freestyle and 400 individual medley and the men's 100 breaststroke and 200 freestyle.

CFL Standings

Indians 5, Brewers 1

In the American League, at Milwankee, Andre Thornton's bases-loaded home run with one out in the 12th inning gave Cleve-land a 5-1 victory over the Brewers and knocked Milwankee out of first place in the AL East. It was Thornton's 23d home run of the year and the fourth bases-loaded homer of his career.

Red Sox 7, White Sox 3

In Chicago, Jim Rice's bases-loaded single helped Boston to score a 7-3 victory over the White, Sox. It was Chicago's fourth straight loss and further jeopardized Tony LaRussa's job as manager. "Obviously, changing managers is one of the things you have to consider along with a lot of other things," said Jerry Reinsdorf, the team's co-owner. The team is 4-12 since the All-Star break, and Comiskey Park fans have been booing many of LaRus-sa's moves, especially pitching

A's 5, Twins 0

In Oakland, Jeff Burroughs hit his eighth home run of the season and Jim Sexton hit a two-run dou-hle to support Rick Langford's four-hit shutout and give the A's a 5-0 victory over Minnesota. Lang-ford walked none, struck out five and faced only three batters over the minimum. Rickey Hendersoo stole his 96th base of the year for Oakland.

Angels 3, Mariners 1

In Analicim, Calif., Doug De-Cinces, who had missed two games with flu, hit a three-run homer to give the Angels a 3-1 triumph over Seattle. California's Steve Renko allowed six hits in 71/2 innings. Luis Sanchez came on in the eighth with runners ou first and second and one out and got Richie Zisk to ground into the Mariners' third double play. DeCinces hit his 13th homer of the year with one ont in the third.

Royals 7, Orioles 2

In Kansas City, Willie Aikens' two-run homer and a run-scoring triple by Frank White in a fourrun second inning helped the Royals to beat Baltimore, 7-2. The Orioles had runners in scor-

ing position in six innings and accumulated four walks, four dou-bles, three singles, a stolen base and a 400-foot homer by Gary Roenicke, yet could not get more than two runs. "We hit the ball all over the park, and they scored the runs," said Earl Weaver, the Baltimore manager. Major League Baseball Leaders

Oakland's Rickey Henderson takes off for second oo his way to another stolen base. With a steal against Minnesota on Thursday, he has 96 in 101 games - and is 22 shy of Lou Brock's record.

The Secrets of a Retired Base Thief

Brock Used a Stopwatch, Movies — and a Sore Hand "Oh, taking some home mov-ies," said Brock.

"Gel ou ita here," said Drysdale.

"But it was too late," said Brock, "I could spend every night

with him and his motion stuck in a

frame so I could study it. And

there was nothing he could do

cently for an old-timers' game. He

sat in his hotel room in gold Ber-

Brock was in Washington re-

By Ira Berkow New York Times Service

WASHINGTON - When Lou Brock broke the major league base-stealing record for a single season with 118 steals in 1974 the record Rickey Henderson of Oakland seems certain to break this season — he was 35 years old. At an age when most ballplayers are on their last legs. Brock was romping like a colt.

His legs were still good, but his head was even better, and it was the latter that made the difference. Brock mulled and analyzed and

plotted the entire art of larceny on the bases. He figured to the 10th of a second the throws and movements of pitchers and catchers, the idiosyncracies of first basemen, how many feet he needed for a

He was revolutionary. He clocked the pitchers' movements with a stopwatch from the dugout, he even took films of the pitchers. Once, during spring training he set up a camera along the foul line to look over Don Drysdale. "What are you doing?" asked

Indianapolis Invests in Sports to Change Image pated here, but the real star of the show has and most functional sports facilities in the na-

Were you aware that Indianapolis is bigger than New Orleans? San Francisco? Honoluli And many other cities that are worth visiting? Most people don't know that because insurance lis is such a hick town. But it just proves that bigger is not better. Bigger is just bigger.
—Mike Royko, columnist, Chicago Sun-Times. Royko's mind is like concrete - all mixed up

but too set to change.
—William H. Hudant 3d, Indianapolis mayor. By Randy Harvey

Les Angeles Times Service
INDIANAPOLIS — This is a city that is mad as hell and not going to take it anymore.

Because of its location near the center of the country and the convergence of its railroads, Hoosiers have long called their largest city and capital the Crossroads of America. But to the rest of the country, it is India-oo-

place, Nap Town. By reputation, it wakes up once a year when it hears, "Gentlemen, start your engines." The rest of the time it is an OK place to live, but you wouldn't want to visit. As the story goes, a flight attendant, upon landing here once, an-nounced to her passengers, "You have just ar-rived in Indianapolis. If you wish, you can turn your watches back 25 years."

The Core of It

But Indianapolis is fighting back. It even has a battle cry. You can't go anywhere in this city without seeing a poster, bumper sticker, T-shirt or button that reads, "Move Over New York. Apple is Our Middle Name." At the core of the Little Apple's efforts to

become big time is a controversial \$78-million, 63,000-seat domed stadium, scheduled for completion in 1984 and counted on by civic leaders to here professional football and base-Meantime, according to Mayor Hudnut's

welcoming remarks during the National Sports

Festival's opening ceremonies last week, Indi-

anapolis will be content to be known as the Amaneur Sports Capital of the United intes."
In order to achieve that, Indianapolis has filled its empty spaces with some of the finest

tion. Opening this summer were a \$21.5-mil-tion natatorium, a \$5.9-million track and field complex and a \$2.5-million velodrome. The \$7million Indianapolis Sports Center, site of the annual U.S. Clay Court Tennis Champion-ships, was completed in 1979. Private Funding

Including the domed stadium and Market

Square Arena, which opened in 1974 and is the home of the Pacers of the National Basketball Association, Indianapolis has spent approximately \$136 million on sports facilities in the last eight years. City officials say approximately half the bill

has been footed by the private sector, including nearly \$45 million from Lilly Endowment Inc. of Indianapolis. With contributions from other nonpublic sources, taxpayers are responsible for only about 34 percent of the cost. Nonetheless, in times of recession, some peo-

ple here question whether becoming the ama-teur sports capital is worthwhile. Although the inployment rate here is 9 percent, the same as the national average, it is close to 20 percent among minorities, many of whom live within a javelin throw of the new swimming and track stadiums on the Indiana University-Purdue University at Indianapolis campus.

About 150 members of the Black Action Committee marched from downtown to the track and field stadium Saturday night protesting that recent construction projects have not eased high unemployment among minorities.

They carried signs that read, "We Love Sports, But We Need Jobs," but their chants

were drowned out by the cheers of a crowd of more than 14,000, the largest ever to see track and field competition in Indiana.

Unqualified Success

Seldom is heard a discouraging word in Indianapolis these days. By all accounts, the National Sports Festival, which has labored in anonymity since its conception in 1978, has been an unqualified success. Many athletes expected to compete in the

1984 Los Angeles Olympics, including long

jumper Carl Lewis, diver Greg Louganis and heavyweight boxer Tyrell Biggs, have partici-

been Indianapolis. Visitors find a city that has undergone a major facelift. For one thing, it has a skyline. For another, it is as clean as Oz. The week before the Sports Festival even the

standards for the city's 2,800 parking meters were given a new coat of silver paint. Ken Sitzberger, a former Olympic diving champion here to do commentary for ABC, returned for the first time last week since he was a student at the University of Indiana at

Bloomington almost 20 years ago.
"I barely recognize the place," he said.
"When I used to come here, it was as dirty as Pittsburgh. Now, it practically sparkles." Stunned by Support

The U.S. Olympic Committee, which sponsors the festival, was cautiously optimistic when Indianapolis was chosen as the site over Colorado Springs and Philadelphia, but it has been stunned by the support from the city. Gate receipts for the 1981 Sports Festival in Syracuse were a record \$450,000. Indianapolis officials sold \$539,000 in advance tickets and expect receipts to surpass \$1 million before the 11 days of competition end Saturday night. "We've got this town so psyched up we could sell tickets to tiddlywinks," said Sandy

Knapp, executive director of the Indiana Sports Corp. The corporation is a conprofit entity established two years ago to attract athletic events. Besides the festival, major amateur competitions held here this year were the U.S. Figure Skating Championships and the U.S.-Soviet Union Pan African track and field meet. The

championships come later this summer. "We don't have mountains or a seashore so we have to become destination-oriented," Knapp says. "We have to give people a reason to come here." Cynics suggest that Indianapolis' yearlons

U.S. Swimming Federation's long-course

effort to assure success for the festival is nothing more than a well-orchestrated campaign to convince the National Football League that the city will support a team. While civic leaders say there is more to it than that, they do not deny that is one of their incentives.

ART BUCHWALD 'Have a Lousy Day!'

WASHINGTON — The trou-ble with most people is that how much traffic I'll have to fight they never seem to leave well enough alone. The other day I said to H. Boyer Royal:

"Have a nice day." "Are you asking me a question?" he wanted to know.

"No, I'm telling you." "What business of yours is it what kind of day

I have?" "It really isn't any of my asiness As a of any of my business. As a matter of fact, I really don't care what your day is like. I was trying to say goodbye to Buchwald you in a friendly

"Then why didn't you just say, Time is like a fashionable host, that slightly shakes his parting guest by the hand, and with his arms outstretch'd as he would fly. grasps in the comer, welcome ever smiles, and farewell goes out

"I don't know why I didn't say at," I told him. "It never occurred to me."

People always tell you to have a nice day, but they never tell you

how to have one."
"I imagine they assume that each person should know how to do it. A nice day to somebody may not necessarily be a nice day to another. The farmer may want it to rain: a lady who just bought a new bathing suit may want the sun to shine. Having your kid away from home could be a nice day for some people, while others will settle for a parking place in town. When you tell someone to have a nice day. you're not responsible for how it

"Has it ever occurred to you," Royal said, "that when you tell someone to have a nice day you might be putting a curse on him I don't believe it has. Would

you care to explain yourself?" "Well, until you said it to me I wasn't giving any thought to what kind of day I was going to have. I was going to take it as it came. But now that you've planted the idea in my head, I'm going to keep thinking about it. When I return to my office I'll worry that Rosalie

to get home. And when I get to the front door I'll be nervous about what mood my wife is in. I know the odds of having a nice day are stacked against me, but until you wished me one, I was able to ignore it. People should not say to anyone, 'Have a nice day,' when they don't know what that person is up against. It's like putting the evil eye on them."

"I believe you're reading too much into my goodbye," I told him. "When someone says, 'Have a nice day,' he is only wishing you good luck "

Then why doesn't he say, 'May the road rise up to meet you and may the wind be always at your back, and may you get to heaven before the devil knows you're

Because most people are in a hurry, and that takes too long to say, unless you're leaving an Irish bar. Why are you making such an issue of a simple thing like this?"

"I guess it's a question of sincerity. Everyone tells you to have a nice day. But how many people do you know who really care if you do or not?

"Royal, you're a cynic." "I am not. I know a department store, and they train their employees to say 'Have a nice day' to

everybody. "Well, wouldn't you rather have them say that than to tell you what's really on their minds?"

"No, I think people should level with you. They should tell you what's on their minds. How can you know whom to trust when even the people who work in the post office tell you to have a nice

Well. Royal, I'm sure you realize that, when I wished you a nice day. I meant it from the bottom of my heart."

"How can I be sure you weren't just trying to get rid of me?" "Because I never say it to somebody unless I truly like and admire them. If you don't want to have a nice day that's all right with me,

"There you go," Royal cried.
"You're putting the evil eye on me

Are We Ready for Computer Operas?

By Donal Henahan

NEW YORK - I hope I am not being disloyal to my own culture when I confess that I do not understand the appeal of electronic games. I remain unmoved by the sight of one Pac person consuming another. The notion of tiny planets bustling about pretending to destroy other tiny planets fails to stir my competitive juices. And playing hockey or soccer on a small screen seems some thing less than an athlete's feat. To put it plainly: Computerized games strike me as the modern young wastre's equivalent of hanging around the corner pool room or pitching pennies until all hours under the streetlights.

And yet, child of our time, I have for years been fascinated by compoters, especially by their persistent efforts to turn themselves into sentient, creative individuals. It comes as a slight shock to realize that 25 years have gone by since Lejaren Hiller, a chemistry professor at the University of Illinois, began working with L.M. Itaacson on programming the Illiac computer to compose music: the "Iliac Suite" and "Compoter Cantata," among other ritles. It was awful stuff, of course, but

even a computer has to begin somewhere. So, would it now surprise you to learn that computers are composing whole operas? Pos-sibly not, since we have all seen computers doing much more wonderful things in those dazzling new sci-fi and comic-book movies. With my own eyes, I have watched a screen full of interlocked hexagons turn instantane-ously into exploding parallelograms and back again. Not since I was given a kaleidoscope for my fifth birthday have I been so delighted and astounded.

Flatty Revolting

Nevertheless, even a jaded observer might be taken aback to discover that computers at the University of Wisconsin under the guidance of Prof. Sheldon Klein, a linguist and professor of computer science, have composed the words and music for an opera enti-iled "Revolt in Flatland." The work is based on "Flatland," a 19th-century fantasy by Edwin Abbott about a two-dimensional world an ingenious choice of subject, you must admit, for the flat screen of a computer terminal. And surely its intentional lack of depth cannot be held against "Revolt in Flatland" when so many fully staged operas by human composers manage to achieve nothing better. The cheerful word that computers have

moved into the field of opera comes through an article by Kevin McKean in Byte, a computer trade journal. Despite C.P. Snow's fa-mous complaint that scientists and humanists inhabit separate cultures and can barely speak to one another, Klein has been making serious efforts to close the gap. In the early 1970s he and his students devised a program that enabled a computer to write 2,100-word mystery stories in 19 seconds each, and they followed with a program for creating Russian fairy tales. From there, it was a logical step to asking the computer to compose an opera.

devised by the group, then translators turn the symbolic plot into words, music and moving pictures of the action." The music, we are told, was generated by an Apple computer, other functions take place on a Terak. The simulation language, whose name is written as five vertical slashes and pronounced "bar-bar," is based on UCSD Pascal, one of many

Already the computer has begun to point us toward golden horizons: A new program will automatically omit all boring scenes.

A future populated by many extremely short works may be beckoning.

languages in which computers and computer ntists converse among themselves.

It is difficult to guess from this brief de-scription what Apple-generated music might sound like. But in theory computers can be programmed to write "music" in the style of any period. If you wanted something that sounds like Mozart, for instance, you would feed into the machine as many 18th century rules and practices as you can gather. The machine would digest all the parameters or variables given to it — rules of harmony and counterpoint, sonata and fugal forms, rhythmic formulas, modulations, melodic shapes, and so on. It would then be able to give back sequences of notes that might with luck appear on paper like something Mozart dropped under his writing table.

Might Resemble Music

The more sophisticated the computer and the program - and the more skilled the programmer — the more the results might resem-ble genuine music. This computer-generated score could then be performed on instruments of the program's choice. In wellequipped electronic-music laboratories, the more usual approach nowadays is to have computers produce the musical data and the sounds as well, through a digital-analogue converter that can synthesize virtually any imaginable sound or combination of sounds.

For a couple of decades now, computers have had this capacity to generate what other computers would recognize as musical scores and to pass on the data to synthesizers for translation into sound. For some time, too, computers have been able to string words and

The article explains: "A simulator gen-erates the plot in a special symbolic language ble stories or plots. It was only a matter of time before the computers would put their terminals together and compose an opera.

Geometric Progression

Klein admits that "Revolt in Flatland" is not. "Don Giovanni." In fact, he says, "I'm not keen on showing it because, to be perfectly frank, the music is superb but the action is quite dull." Does that disqualify it on today's opera market? Hardly. But the plot as spelled out by the scientist does seem to lack something: "Most of what's happening in the current version is that little squares and triangles and polygons are moving slowly from one house to another. The action only happens occasionally, when they meet." Klein is too modest, of course: I have seen half a dozen new operas recently that had duller scenarios and far less character motivation.

Aiready the computer-composer has begun to point us toward golden horizons: A new program being devised for "Revolt in Flat-land" will automatically omit all boring scenes. A future populated by many extreme ly short operas may be beckoning. In fact, can we be certain what would result if the new "Flatland" program were to be put to work screening the standard operatic reperto-ry? Who knows how much would be left of, say, "Il Trovatore" or "Parsifal"? But at the moment, Klein admits, the "Flatland" program finds it difficult even to criticize or edit itself. "Potentially, our opera could be five hours long, like a real opera, but at the end there would be nobody watching." At least the computer recognizes it has a problem.

Farfetched and naive though current theones of computer participation in the arts may seem, we must be careful not to dismiss the idea of educable and ultimately creative machines. Experimental projects such as the ones Klein and his students are carrying out may not lead anywhere we care to follow, but no serious attempt to figure out how the creative mind works is a trivial enterprise. Natalie Dehn of Yale University, a researcher whose specialty is helping computers try to whose specialty is neighing computers by we generate good narrative prose, explains her goal: "I'm trying to construct a model of what makes people creative. If my model is correct, then my program should be able to make up interesting stories."

A point to be considered, however, is that the computer must be programmed by human minds of the widest sympathies and artistic understanding or its narrative will remain forever a mechanical plot. There is never an ex-cess of such gifted people. Perhaps, in some brave future, the production of art will be the province of the many humanoids working in disciplined teams, computer craftsmen who will remain as anonymous as the builders of Chartres Cathedral. But for now, my own attention to music or any other art has to be based on an implicit trust that there is an artist in there somewhere trying to express something. Sorry, but nothing else computes.

Holden Gift Disputed

court. The money should go to was the queen's great-gr fund, she said in an appearance be-fore Superior Court Judge Rouald chael Fagan — who scaled a fence, E. Swearinger in Los Angeles. The actor, who died Nov. 16 at age 63, the queen's becchamber and specified in his will that his executor award money from the sale of his interest in a game farm and safari club in Kenya to a charity that is "interested in the preservation of wildlife and the environment and, if it is possible, has ties to all interests in Africa and more specifically, the Republic of Kenya." Powers objected to the designation of the African Fund. the choice of the executor. She said she had met employees of the fund in Kenya and considered them "neophytes." Powers, a close friend of Holden's for several years, received a \$250,000 bequest in his will. She recommended that the \$80,000 go to the William Holden Wildlife Fund, which she has organized with the help and approval of Holden's partners in the Kenya game ranch. The judge made no immediate decision on

Robert S. Mulliken, a Nobel Prize-winning scientist from the University of Chicago, is the 1983 winner of the United States highest award in chemistry. Mulliken, 86, will receive the Priestley Medal, awarded annually by the American Chemical Society, at the group's national meeting next March. The scientist, who worked on the Manhattan Project to build the first atomic bomb, was awarded the 1966 Nobel Prize in chemistry for his work on the motion of molecules. He has been at the University of Chicago for most of his academic career. . . The Norwegian actress Liv Ullmann was named winner of the International Platform Association's 1982 Eleanor Roosevelt Award for her work with UNICEF and the International Rescue Committee. The award will be presented Aug. 6 during the association's annual convention in Washington.

> Bob Hope, star of many "road" films with the late Bing Crosby, has a road he can call his own in northwestern Miami. The City Commission agreed to rename a stretch of Northwest Ninth Avenne "Bob Hope Road," at the request of the National Parkinson Foundation and the University of Miami School of Medicine. For 25 years. Hope has been honorary chairman of the Miami-based foundation, which is seeking a cure for Parkinson's disease.

Archibeld MacLeish, in an inter-

view shortly before his death, said-he almost joined the Communist Party in the 1930s because he was infuriated by President Herbert Hoover's attitude toward the Depression. The poet, who was inter-viewed at his farm in western Massachusetts before his death earlier this year at age 89, told American Heritage magazine than he had "never seen anything that even remotely approached the mis-ery and anguish and horror of the Great Depression Things I thought just couldn't happen in a human society, were happening. But he rejected communism, he said, because "down deep I hated the communist conception of the relation of the state to the people it governed."

Liberace, who was known as Wladzin Valentino Liberace when he lived in Milwankee as a boy, returned to give his first home town concert in four years. In an amport news conference, the flamboyant pianist, 63, spoke of his youth and the time he had gotten lost and wandered onto the grounds of the Wisconsin State Fair. Police found him and took him home in a motorcycle sidecar. "I thought that was terrific," he said. "I wanted to get lost every day."
